Activity Report

Name of the Activity	: Lecture on Corruption Free India
Type of Activity	: Constitutional Obligations
Date and Time of Activity	: 22.09.2021 @ 04.00 pm
Details of Participants	: Faculty: 00 Students: 43
Coordinator / Resource Person	: Dr. C. Kumar Reddy, Asst. Professor
Organizing Dept./Support System	: Department of Electrical and Electronics Engineering

Description

Many countries around the world face the problem of corruption. India is one such country that is severely impacted by this problem. Corruption is the root cause of various other serious problems in our country. We can fight corruption if we stand united and are determined to drive this evil away. Here are a few ways to rid the country of corruption:

- **Spread Education**

Lack of education is one of the main reasons for the growing corruption. Many people belonging to the uneducated class uses illegal and corrupt means to earn their livelihood. Spreading education can help in curbing this problem to a large extent. The government must make policies to ensure that every child in the country goes to school and secures education.

- **Give Strict Punishment**

Strict laws must be made for people who indulge in corrupt practices such as taking and giving bribery, using illegal ways to expand their businesses, accumulating black money, etc. These people must be punished severely.

- **Conduct Sting Operations**

The media and government should join hands to conduct sting operations to uncover corrupt people in different sectors. Such sting operations will uncover corrupt people and discourage others from indulging in such practices.

- **Follow the Right Course**

We must take it as a responsibility to follow the right course of getting things done rather than giving bribes to get them done speedily or to escape fines.

- **Install Cameras and Recorders**

Technology can also help in bringing down corruption. CCTV cameras must be installed in government offices, at red lights, and in other places where the cases of taking and giving bribes are high. Recorders can be installed at places where it is difficult to install cameras. People can also take the initiative to record any corrupt practice on their mobile and share it at their nearby police station.

- **Build Confidence**

People in India are scared of going to the police, even for lodging a complaint against someone. They avoid going to the police station because they fear getting caught up in the nitty-gritty of the police inquiry, which may bring a bad name to them. The procedures at the police station must be such that those who wish to help the police must not face any inconvenience.

Therefore, there are many ways to free India from corruption. Only the willingness to implement these ways is required.
