

**Kandula Sreenivasa Reddy Memorial College of Engineering  
(Autonomous)**

**Kadapa – 516005, A.P.**

**(Approved by AICTE, Affiliated to JNTUA, Ananthapuram, Accredited by NAAC)  
(An ISO 9001-2008, ISO 14001:2015 Certified Institution)**

=====

## **B. Tech (Regular)**

**(Effective for the students admitted into I year from the  
Academic Year 2023-24 onwards and Lateral Entry  
students admitted into II year from Academic Year:  
2024-25 onwards)**

**Academic Regulations (R23UG)**

**Course Structure and Syllabus**

**(I, II, III and IV Sem.)**

## **VISION AND MISSION OF THE INSTITUTE**

### **VISION**

To evolve as center of repute for providing quality academic programs amalgamated with creative learning and research excellence to produce graduates with leadership qualities, ethical and human values to serve the nation.

### **MISSION**

- M1:** To provide high quality education with enriched curriculum blended with impactful teaching-learning practices.
- M2:** To promote research, entrepreneurship and innovation through industry collaborations.
- M3:** To produce highly competent professional leaders for contributing to Socio-economic development of region and the nation.

# VISION AND MISSION OF THE DEPARTMENT

## VISION

To evolve as a recognized centre of excellence in the area of Computer Science and Engineering and other related inter-disciplinary fields.

## MISSION

**M1:** To produce competent and industry ready professionals through well balanced curriculum and innovative pedagogy.

**M2:** To provide conducive environment for research by establishing centre of excellence and industry collaborations.

**M3:** To instil leadership qualities, ethical values among students through various co-curricular and extracurricular activities.

## PROGRAM EDUCATIONAL OBJECTIVES

A graduate of the K.S.R.M.C.E, C.S.E should have a successful career in CSE or a related field, and within three to five years, should

**PEO1:** To excel in their career as competent software engineer in IT and allied organizations.

**PEO2:** To pursue higher education and to demonstrate research temper for providing solutions to engineering problems.

**PEO3:** To contribute for the societal development by exhibiting leadership, through professional, social and ethical values.

## PROGRAM OUTCOMES

**PO1 - Engineering Knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

**PO2 - Problem Analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

**PO3 - Design/Development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

**PO4 - Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5 - Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

**PO6 - The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues, and the consequent responsibilities relevant to the professional engineering practice.

**PO7 - Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

**PO8 - Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of engineering practice.

**PO9 - Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

**PO10 - Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

**PO11 - Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

**PO12 - Life-long learning:** Recognize the need for and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

## **PROGRAM SPECIFIC OBJECTIVES**

PSOs are statements that describe what the graduates of a specific engineering program should be able to do:

**PSO1 - Professional Skills:** The ability to understand, analyze and develop computer programs in the areas related to algorithms, system software, multimedia, web design, big data analytics, and networking for efficient design of computer-based systems of varying complexity.

**PSO2 - Problem-Solving Skills:** The ability to apply standard practices and strategies in software project development using open-ended programming environments to deliver a quality product for business success.

**PSO3 - Successful Career and Entrepreneurship:** The ability to employ modern computer languages, environments, and platforms in creating innovative career paths to be an entrepreneur, and a zest for higher studies.

# Academic Regulations (R23UG) for B. Tech (Regular-Full time)

(Effective for the students admitted into I year from the Academic Year 2023-24 onwards)

## 1. Award of the Degree

- (a) Award of the B.Tech. Degree / B.Tech. Degree with a Minor if he/she fulfils the following:
  - (i) Pursues a course of study for not less than four academic years and not more than eight academic years. However, for the students availing Gap year facility this period shall be extended by two years at the most and these two years would in addition to the maximum period permitted for graduation (Eight years).
  - (ii) Registers for 160 credits and secures all 160 credits.
- (b) Award of B.Tech. degree with Honors if he/she fulfils the following:
  - (i) Student secures additional 15 credits fulfilling all the requisites of a B.Tech. program i.e., 160 credits.
  - (ii) Registering for Honors is optional.
  - (iii) Honors is to be completed simultaneously with B.Tech. program.

- 2. Students, who fail to fulfil all the academic requirements for the award of the degree within eight academic years from the year of their admission, shall forfeit their seat in B.Tech. course and their admission stands cancelled. This clause shall be read along with clause 1(a) (i).

## 3. Admissions

Admission to the B. Tech Program shall be made subject to the eligibility, qualifications and specialization prescribed by the A.P. State Government/University from time to time. Admissions shall be made either based on the merit rank obtained by the student in the common entrance examination conducted by the A.P. Government/University or any other order of merit approved by the A.P. Government/University, subject to reservations as prescribed by the Government/University from time to time.

## 4. Program related terms

**Credit:** A unit by which the course work is measured. It determines the number of hours of instruction required per week. One credit is equivalent to one hour of teaching (Lecture/Tutorial) or two hours of practical work/field work per week.

### Credit Definition:

1 Hr. Lecture (L) per week	1 credit
1 Hr. Tutorial (T) per week	1 credit
1 Hr. Practical (P) per week	0.5 credit
2 Hrs. Practical (Lab) per week	1 credit

- a) **Academic Year:** Two consecutive (one odd + one even) Semesters constitute one academic year.
- b) **Choice Based Credit System (CBCS):** The CBCS provides a choice for students to select from the prescribed courses.

#### 5. Semester/Credits:

- i) A Semester comprises 90 working days and an academic year is divided into two Semesters.
- ii) The summer term is for eight weeks during summer vacation. Internship/ apprenticeship / work-based vocational education and training can be carried out during the summer term, especially by students who wish to exit after two Semesters or four Semesters of study.
- iii) Regular courses may also be completed well in advance through MOOCs satisfying prerequisites.

#### 6. Structure of the Undergraduate Program

All courses offered for the undergraduate program (B. Tech.) are broadly classified as follows:

S. No.	Category	Breakup of Credits (Total 160)	Percentage of total credits	AICTE Recommendation (%)
1.	Humanities and Social Science including Management (HM)	13	8 %	8 – 9%
2.	Basic Sciences (BS)	20	13 %	12 - 16%
3.	Engineering Sciences (ES)	23.5	14%	10 – 18%
4.	Professional Core (PC)	54.5	34 %	30 – 36%
5.	Electives – Professional (PE) & Open (OE); Domain Specific Skill Enhancement Courses (SEC)	33	21 %	19 - 23%
6.	Internships & Project work (PR)	16	10 %	8 – 11%
7.	Mandatory Courses (MC)	Non-credit	Non-credit	-

#### 7. Course Classification:

All subjects / courses offered for the undergraduate program in Engineering & Technology (B.Tech degree programs) are broadly classified as follows:

S. No.	Broad Course Classification	Course Category	Description
1.	Foundation Courses	Foundation courses	Includes Mathematics, Physics and Chemistry; fundamental engineering courses; humanities, social sciences and management courses
2.	Core Courses	Professional Core Courses (PC)	Includes subjects related to the parent discipline / department / branch of Engineering
		Professional Elective Courses (PE)	Includes elective subjects related to the parent discipline / department / branch of Engineering
		Open Elective Courses (OE)	Elective subjects which include inter disciplinary subjects or subjects in an area outside the parent discipline/ department/ branch of Engineering
		Domain specific skill enhancement courses (SEC)	Interdisciplinary / job-oriented / domain courses which are relevant to the industry
4.	Project & Internships	Project	B.Tech. Project or Major Project
		Internships	Summer Internships – Community based and Industry Internships; Industry oriented Full Semester Internship
5.	Audit Courses	Mandatory non-credit courses	Covering subjects of developing desired attitude among the learners

## 8. Program Pattern

- i. Total duration of the of B. Tech (Regular) Program is four academic years.
- ii. Each academic year of study is divided into two Semesters.
- iii. Minimum number of instruction days in each Semester is 90 days.
- iv. There shall be mandatory student induction program for fresher's, with a three-week duration before the commencement of first Semester. Physical activity, Creative Arts, Universal Human Values, Literary, Proficiency Modules, Lectures by Eminent People, Visits to local Areas, Familiarization to Dept. / Branch & Innovations etc., are included as per the guidelines issued by AICTE.
- v. Health/wellness/yoga/sports and NSS /Scouts & Guides / Community service activities are made mandatory as credit courses for all the under graduate students.
- vi. Courses like Environmental Sciences, Indian Constitution, Technical Paper Writing & IPR are offered as non-credit mandatory courses for all the undergraduate students.
- vii. Design Thinking for Innovation & Tinkering Labs are made mandatory as credit courses for all the undergraduate students.
- viii. Increased flexibility for students through an increase in the elective component of the curriculum, with 05 Professional Elective courses and 04 Open Elective courses.

- ix. Professional Elective Courses, include the elective courses relevant to the chosen specialization/branch. Proper choice of professional elective courses can lead to students specializing in emerging areas within the chosen field of study.
- x. A total of 04 Open Electives are offered in the curriculum. A student can complete the requirement for B.Tech. Degree with a Minor within the 160 credits by opting for the courses offered through various verticals/tracks under Open Electives.
- xi. While choosing the electives, students shall ensure that they do not opt for the courses with syllabus contents similar to courses already pursued.
- xii. A pool of interdisciplinary/job-oriented/domain skill courses which are relevant to the industry are integrated into the curriculum of all disciplines. There shall be 05 skill-oriented courses offered during III to VII Semesters. Among the five skill courses, four courses shall focus on the basic and advanced skills related to the domain/interdisciplinary courses and the other shall be a soft skills course.
- xiii. Students shall undergo mandatory summer internships, for a minimum of eight weeks duration at the end of second and third year of the program. The internship at the end of second year shall be community oriented and industry internship at the end of third year.
- xiv. There shall also be mandatory full internship in the final Semester of the program along with the project work.
- xv. Undergraduate degree with Honors is introduced for the students having good academic record.
- xvi. The college shall take measures to implement Virtual Labs (<https://www.vlab.co.in>) which provide remote access to labs in various disciplines of Engineering and will help student in learning basic and advanced concept through remote experimentation. Student shall be made to work on virtual lab experiments during the regular labs.
- xvii. The Principal shall assign a faculty advisor/mentor after admission to a group of students from same department to provide guidance in courses registration /career growth/placements/opportunities for higher studies/GATE/other competitive exams etc.
- xviii. Preferably 25% of course work for the theory courses in every Semester shall be conducted in the blended mode of learning.

## 9. Evaluation Process

The performance of a student in each Semester shall be evaluated subject wise with a maximum of 100 marks for theory and 100 marks for practical subject. Summer Internships shall be evaluated for 50 marks, Full Internship & Project work in final Semester shall be evaluated for 200 marks, mandatory courses with no credits shall be evaluated for 30 mid Semester marks.

A student has to secure not less than 35% of marks in the end examination and a minimum of 40% of marks in the sum total of the mid Semester and end examination marks taken together for the theory, practical, design, drawing subject or project etc. In case of a mandatory course, he/she should secure 40% of the total marks.

## Theory Courses

Assessment Method	Marks
Continuous Internal Assessment	30
Semester End Examination	70
<b>Total</b>	<b>100</b>

- i) For theory subject, the distribution shall be 30 marks for Internal Evaluation and 70 marks for the End-Examination.
- ii) For practical subject, the distribution shall be 30 marks for Internal Evaluation and 70 marks for the End- Examination.
- iii) If any course contains two different branch subjects, the syllabus shall be written in two parts with 3 units each (Part-A and Part-B) and external examination question paper shall be set with two parts each for 35 marks.
- iv) If any subject is having both theory and practical components, they will be evaluated separately as theory subject and practical subject. However, they will be given same subject code with an extension of 'T' for theory subject and 'P' for practical subject.

### a) Continuous Internal Evaluation

- i) For theory subjects, during the Semester, there shall be two midterm examinations. Each midterm examination shall be evaluated for 30 marks of which 5 marks for objective paper (20 minutes duration), 20 marks for subjective paper (100 minutes duration) and 5 marks for assignment.
- ii) Objective paper shall contain 05 short answer questions with 2 marks each or maximum of 20 bits for 10 marks. Subjective paper shall contain 4 either or type questions (totally eight questions from 1 to 8) of which student has to answer one from each either-or type questions. Each question carries 10 marks. The marks obtained in the subjective paper are condensed to 20 marks, the marks obtained in the objective paper is condensed to 5 marks.

### Note:

- The objective paper shall be prepared in line with the quality of competitive examinations questions.
- The subjective paper shall contain 4 either or type questions of equal weightage of 10 marks. Any fraction shall be rounded off to the next higher mark.
- The objective paper shall be conducted by the institution on the day of subjective paper test.
- Assignments shall be in the form of problems, mini projects, design problems, slip tests, quizzes etc., depending on the course content. It should be continuous assessment throughout the Semester and the average marks shall be considered.

### **Assignments:**

The assignments shall aid and hone the daily routine of students.

Assignments shall be stimulating and thought provoking to the student. While some questions may test student's understanding of the subject, there shall be questions that imply connect to real world applications. A variety of questions can posed in assignments.

- i. *Number:* A minimum of four assignments shall be given in each subject with one assignment from Unit I to IV of syllabus of that subject.
  - ii. *Quantum of work:* An assignment shall take about four to six hours of study / work per week. Assignments shall not be overloaded nor under loaded. As a guideline, each assignment may contain five questions, each question taking an hour to answer.
  - iii. *Marks:* Each assignment must be evaluated for fifty marks. Final marks are obtained by averaging all the assignment marks and reducing it to five marks.
  - iv. *Deadlines:* Students shall be given at least one-week time to complete and submit assignments. Assignments shall be submitted within deadline. Late submissions should be awarded zero marks.
  - v. *General:* It is advised to administer assignments using Google Classroom.
- iii) If the student is absent for the mid Semester examination, no re-exam shall be conducted and mid Semester marks for that examination shall be considered as zero.
- iv) First midterm examination shall be conducted for I, II and III units of syllabus with one / two either or type questions from each unit. The second midterm examination shall be conducted for III, IV and V units with one/two either or type questions from each unit. (Each midterm test shall cover 50% of the syllabus approximately).
- v) Final mid Semester marks shall be arrived at by considering the marks secured by the student in both the mid examinations with 80% weightage given to the better mid exam and 20% to the other.

### **For Example:**

Marks obtained in first mid: 25 Marks obtained in second mid: 20  
Final mid Semester Marks:  $(25 \times 0.8) + (20 \times 0.2) = 24$

If the student is absent for any one midterm examination, the final mid Semester marks shall be arrived at by considering 80% weightage to the marks secured by the student in the appeared examination and zero to the other. For Example:

Marks obtained in first mid: Absent Marks obtained in second mid: 25  
Final mid Semester Marks:  $(25 \times 0.8) + (0 \times 0.2) = 20$

- vi) After the course work is over, the student is permitted to improve his / her internal marks of any 3 theory subjects in the entire course. However he/she will have to attend the course work.

**b) Semester-End Examination Evaluation:**

End examination of theory subjects shall have the following pattern:

- i) There shall be 6 questions and all questions are compulsory.
- ii) Question ‘ 1’ shall contain 10 compulsory short answer questions for a total of 20 marks such that each question carries 2 marks. There shall be 2 short answer questions from each unit.
- iii) The questions from ‘ 2’ to ‘ 6’ shall be set by covering one unit of the syllabus for each question. In each of the questions from ‘2’ to ‘6’, there shall be either/or type questions of 10 marks each. Student shall answer any one of them.

End examination of theory subjects consisting of two parts of different subjects, for Example: Basic Electrical & Electronics Engineering shall have the following pattern:

- i) Question paper shall be in two parts viz., Part A and Part B with equal weightage of 35 marks each.
- ii) In each part, question 1 shall contain 5 compulsory short answer questions for a total of 5 marks such that each question carries 1 mark.
- iii) In each part, questions from 2 to 4, there shall be either/or type questions of 10 marks each. Student shall answer any one of them.
- iv) The questions from 2 to 4 shall be set by covering one unit of the syllabus for each question.

**Practical Courses**

a) Practical courses shall be evaluated as tabulated below

<b>Assessment Method</b>	<b>Marks</b>
Continuous Internal Assessment	30
Semester End Examination	70
<b>Total</b>	<b>100</b>

- a) For practical courses, there shall be a continuous evaluation during the Semester for 30 sessional marks and end examination shall be for 70 marks.
- b) For Continuous internal assessment, Day-to-day work in the laboratory shall be evaluated for 30 marks by the concerned laboratory teacher based on the lab observation, record and performance of student in the laboratory.
- c) The semester-end examination shall be evaluated for 70 marks, conducted by the concerned laboratory teacher and a senior expert in the subject from the same department.
  - Procedure: 20 marks
  - Experimental work & Results: 30 marks
  - Viva-voce: 20 marks.

In a practical subject consisting of two parts (Eg. Basic Electrical & Electronics Engineering Lab), the end examination shall be conducted for 70 marks as a single laboratory in 3 hours. Mid Semester examination shall be evaluated as above for 30 marks in each part and final mid Semester marks shall be arrived by considering the average of marks obtained in two parts.

- d) For the subject having design and/or drawing, such as Engineering Drawing, the distribution of marks shall be 30 for mid Semester evaluation and 70 for end examination.

Assessment Method	Marks
Continuous Internal Assessment	30
Semester End Examination	70
<b>Total</b>	<b>100</b>

Day-to-day work shall be evaluated for 15 marks by the concerned subject teacher based on the reports/submissions prepared in the class. And there shall be two midterm examinations in a Semester for duration of 2 hours each for 15 marks with weightage of 80% to better mid marks and 20% for the other. The subjective paper shall contain 3 either or type questions of equal weightage of 5 marks. There shall be no objective paper in mid Semester examination. The sum of day-to-day evaluation and the mid Semester marks will be the final sessional marks for the subject. The end examination pattern for Engineering Graphics, shall consist of 5 questions, either/or type, of 14 marks each. There shall be no objective type questions in the end examination. However, the end examination pattern for other subjects related to design/drawing, multiple branches, etc is mentioned along with the syllabus.

- e) There shall be no external examination for mandatory courses with zero credits. However, attendance shall be considered while calculating aggregate attendance and student shall be declared to have passed the mandatory course only when he/she secures 40% or more in the internal examinations. In case, the student fails, a re-examination shall be conducted for failed candidates for 30 marks satisfying the conditions mentioned in item 1 & 2 of the regulations.
- f) Three batches complete record of laboratory records and Internal and End Semester test papers shall be preserved in the college and shall be produced to the Committees of the University as and when the same are asked for.
- g) **Revaluation of End Examination Scripts**
- Revaluation of End Examination scripts is allowed for theory subjects only by paying requisite fee.
  - Procedure for Revaluation: The script will be revaluated by an examiner appointed by the principal. The maximum of revaluation and regular end examination marks will be awarded for that subject. If the deviation is more than 12 marks, the script is reevaluated second time.
  - A student can apply for revaluation in a subject only once
- h) **Curriculum Delivery:** The curriculum will also be delivered by the industry expert or adjunct faculties, who have industry experience if some MOU is signed between industry and institution.
- i) Subjects taught in collaboration with the industry, the assessment will be done by either the industry or the college as decided by the concerned Chairman of the Board

of Studies.

- j) The question papers for theory subjects shall be set by faculty members outside of the Institute. The external faculty members for question paper setting shall be appointed by the Principal.
- k) Evaluation of answer scripts shall be done by either Internal or External examiners appointed by the Principal. A minimum of 50% of subjects will be evaluated by external examiners.
- l) For laboratory subjects, end examination shall be conducted by a committee consisting of two internal examiners. One examiner shall be appointed by Head of Department of concerned Major, and the other examiner shall be appointed by the Principal.
- m) For project work viva-voce, end examination shall be conducted by a committee consisting of one internal examiner, one external examiner, and the concerned guide of the student. Internal examiner shall be appointed by Head of Department of concerned Major, and the external examiner shall be appointed by the Principal.

#### **10. Skill oriented Courses**

- i) There shall be five skill-oriented courses offered during III to VII Semesters.
- ii) Out of the five skill courses two shall be skill-oriented courses from the same domain. Of the remaining three skill courses, one shall be a soft skill course and the remaining two shall be skill-advanced courses from the same domain / Interdisciplinary / Job oriented.
- iii) The course shall carry 100 marks and shall be evaluated through continuous assessments during the Semester for 30 sessional marks and end examination shall be for 70 marks. Day-to-day work in the class / laboratory shall be evaluated for 30 marks by the concerned teacher based on the regularity/assignments/viva/mid Semester test. The end examination similar to practical examination pattern shall be conducted by the concerned teacher and an expert in the subject nominated by the principal.
- iv) The Head of the Department shall identify a faculty member as coordinator for the course. A committee consisting of the Head of the Department, coordinator and a senior Faculty member nominated by the Head of the Department shall monitor the evaluation process. The marks / grades shall be assigned to the students by the above committee based on their performance.
- v) The student shall be given an option to choose either the skill courses being offered by the college or to choose a certificate course being offered by industries / Professional bodies or any other accredited bodies. If a student chooses to take a Certificate Course offered by external agencies, the credits shall be awarded to the student upon producing the Course Completion Certificate from the agency. A committee shall be formed by the principal of the college to evaluate the grades / marks given for a course by external agencies and convert to the equivalent marks /

grades.

- vi) The recommended courses offered by external agencies, conversions and appropriate grades/marks are to be approved by the respective BoS chairman at the beginning of the Semester.
- vii) If a student prefers to take a certificate course offered by external agency, the department shall mark attendance of the student for the remaining courses in that Semester excluding the skill course in all the calculations of mandatory attendance requirements upon producing a valid certificate as approved by the University.

### **11. Massive Open Online Courses (MOOCs):**

A Student has to pursue and complete one course compulsorily through MOOCs approved by the University. A student can pursue courses other than core through MOOCs and it is mandatory to complete one course successfully through MOOCs for awarding the degree. A student is not permitted to register and pursue core courses through MOOCs.

A student shall register for the course (Minimum of either 8 weeks or 12 weeks) offered through MOOCs with the approval of Head of the Department. The Head of the Department shall appoint one mentor to monitor the student's progression. The student needs to earn a certificate by passing the exam. The student shall be awarded the credits assigned in the curriculum only by submission of the certificate. Examination fee, if any, will be borne by the student.

Students who have qualified in the proctored examinations conducted through MOOCs platform can apply for credit transfer as specified and are exempted from appearing internal as well as external examination (for the specified equivalent credit course only).

Necessary amendments in rules and regulations regarding adoption of MOOC courses would be proposed from time to time.

### **12. Credit Transfer Policy**

Adoption of MOOCs is mandatory, to enable Blended model of teaching-learning as also envisaged in the NEP 2020. As per University Grants Commission (Credit Framework for Online Learning Courses through SWAYAM) Regulation, 2016, a maximum of 20% of the total courses being offered in a particular program are allowed i.e., maximum of 32 credits through MOOCs platform.

- i) The College shall offer credit mobility for MOOCs and give the equivalent credit weightage to the students for the credits earned through online learning courses.
- ii) Student registration for the MOOCs shall be only through the respective department of the institution, it is mandatory for the student to share necessary information with the department.
- iii) Credit transfer policy will be applicable to the Professional & Open Elective and skill courses only.
- iv) The concerned department shall identify the courses permitted for credit transfer.
- v) The College shall notify at the beginning of Semester the list of the online learning courses eligible for credit transfer.
- vi) The institution shall designate a faculty member as a Mentor for each course to

- guide the students from registration till completion of the credit course.
- vii) The college shall ensure no overlap of MOOC exams with that of the end Semester examination schedule. In case of delay in results, the college will re-issue the marks sheet for such students.
  - viii) Student pursuing courses under MOOCs shall acquire the required credits only after successful completion of the course and submitting a certificate issued by the competent authority along with the percentage of marks and grades.
  - ix) The institution shall submit the following to the examination section of the college:
    - a) List of students who have passed MOOC courses in the current Semester along with the certificate of completion.
    - b) Undertaking form filled by the students for credit transfer.
  - x) The College academic council shall resolve any issues that may arise in the implementation of this policy from time to time and shall review its credit transfer policy in the light of periodic changes brought by UGC, SWAYAM, NPTEL and state government.

**Note:** Students shall be permitted to register for MOOCs offered through online platforms approved by the Head of the department from time to time.

### **13. Academic Bank of Credits (ABC)**

The institution has implemented Academic Bank of Credits (ABC) to promote flexibility in curriculum as per NEP 2020 to

- i. provide option of mobility for learners across the universities of their choice
- ii. provide option to gain the credits through MOOCs from approved digital platforms.
- iii. facilitate award of certificate/diploma/degree in line with the accumulated credits in ABC
- iv. execute Multiple Entry and Exit system with credit count, credit transfer and credit acceptance from students' account.

### **14. Mandatory Internships**

**Summer Internships:** Two summer internships either onsite or virtual each with a minimum of 08 weeks' duration, done at the end of second and third years, respectively are mandatory. It shall be completed in collaboration with local industries, Govt. Organizations, construction agencies, Power projects, software MNCs or any industries in the areas of concerned specialization of the Undergraduate program. One of the two summer internships at the end of second year (Community Service Project) shall be society oriented and shall be completed in collaboration with government organizations / NGOs & others. The other internship at the end of third year is Industry Internship and shall be completed in collaboration with Industries. The student shall register for the internship as per course structure after commencement of academic year. The guidelines issued by the APSCHE / University shall be followed for carrying out and evaluation of Community Service Project and Industry Internship.

Evaluation of the summer internships shall be through the departmental committee. A student will be required to submit a summer internship report to the concerned department and appear for an oral presentation before the departmental committee comprising of Head of the Department, supervisor of the internship and a senior

faculty member of the department. A certificate of successful completion from industry shall be included in the report. The report and the oral presentation shall carry 50% weightage each. It shall be evaluated for 50 external marks. There shall be no internal marks for Summer Internship. A student shall secure minimum 40% of marks for successful completion. In case, if a student fails, he/she shall reappear as and when Semester supplementary examinations are conducted by the institution.

**Full Semester Internship and Project work:** In the final Semester, the student should mandatorily register and undergo internship (onsite/virtual) and in parallel he/she should work on a project with well-defined objectives. At the end of the Semester the candidate shall submit an internship completion certificate and a project report. A student shall also be permitted to submit project report on the work carried out during the internship.

The project report shall be evaluated with an external examiner. The total marks for project work 200 marks and distribution shall be 60 marks for internal and 140 marks for external evaluation. The supervisor assesses the student for 30 marks (Report: 15 marks, Seminar: 15 marks). At the end of the Semester, all projects shall be showcased at the department for the benefit of all students and staff and the same is to be evaluated by the departmental Project Review Committee consisting of supervisor, a senior faculty and HOD for 30 marks. The external evaluation of Project Work is a Viva-Voce Examination conducted in the presence of internal examiner and external examiner appointed by the principal and is evaluated for 140 marks.

The college shall facilitate and monitor the student internship programs. Completion of internships is mandatory, if any student fails to complete internship, he/she will not be eligible for the award of degree. In such cases, the student shall repeat and complete the internship.

## 15. Guidelines for offering a Minor

To promote interdisciplinary knowledge among the students, the students admitted into B.Tech. in a major stream/branch are eligible to obtain degree in Minor in another stream.

- i) The Minor program requires the completion of 12 credits in Minor stream chosen.
- ii) Two courses for 06 credits related to a Minor are to be pursued compulsorily for the minor degree, but maybe waived for students who have done similar/equivalent courses. If waived for a student, then the student must take an extra elective course in its place. It is recommended that students should complete the compulsory courses (or equivalents) before registering for the electives.
- iii) Electives (minimum of 2 courses) to complete a total of 12 credits.

**Note:** A total of 04 Open Electives are offered in the curriculum. A student can complete the requirement for Minor by opting for the courses offered through various verticals/tracks under Open Electives.

## 16. Guidelines for offering Honors

The objective of introducing B.Tech. (Hons.) is to facilitate the students to choose additionally the specialized courses of their choice and build their competence in a specialized area in the UG level. The program is a best choice for academically excellent

students having good academic record and interest towards higher studies and research.

- i) Honors is introduced in the curriculum of all B. Tech. programs offering a major degree and is applicable to all B. Tech (Regular and Lateral Entry) students admitted in Engineering & Technology.
- ii) A student shall earn additional 15 credits for award of B.Tech.(Honors) degree from same branch/department/discipline registered for major degree. This is in addition to the credits essential for obtaining the Undergraduate degree in Major Discipline (i.e., 160 credits).
- iii) A student is permitted to register for Honors in IV Semester after the results of III Semester are declared and students may be allowed to take maximum two subjects per Semester pertaining to the Honors from V Semester onwards.
- iv) The concerned Principal of the college shall arrange separate class work and timetable of the courses offered under Honors program.
- v) Courses that are used to fulfil the student's primary major may not be double counted towards the Honors. Courses with content substantially equivalent to courses in the student's primary Major may not be counted towards the Honors.
- vi) The attendance for the registered courses under Honors and regular courses offered for Major degree in a Semester are to be considered separately.
- vii) A student shall maintain an attendance of 75% in all registered courses under Honors to be eligible for attending Semester end examinations.
- viii) A student registered for Honors shall pass in all subjects that constitute the requirement for the Honors degree program. No class/division (i.e., second class, first class and distinction, etc.) shall be awarded for Honors degree program.
- ix) If a student drops or is terminated from the Honors program, the additional credits so far earned cannot be converted into open or core electives; they will remain extra. However, such students will receive a separate grade sheet mentioning the additional courses completed by them.
- x) The Honors will be mentioned in the degree certificate as Bachelor of Technology (Honors) in XYZ. For example, B.Tech. (Honors) in Mechanical Engineering

#### **Enrolment into Honors:**

- i) Students of a Department/Discipline are eligible to opt for Honors program offered by the same Department/Discipline
- ii) The enrolment of student into Honors is based on the CGPA obtained in the major degree program. CGPA shall be taken up to III Semester in case of regular entry students and only III Semester in case of lateral entry students. Students having 7 CGPA without any backlog subjects will be permitted to register for Honors.
- iii) If a student is detained due to lack of attendance either in Major or in Honors, registration shall be cancelled.
- iv) Transfer of credits from Honors to regular B. Tech degree and vice-versa shall

not be permitted.

- v) Honors is to be completed simultaneously with a Major degree program.

### **Registration for Honors:**

- i) The eligible and interested students shall apply through the HOD of his/her parent department. The whole process should be completed within one week before the start of every Semester. Selected students shall be permitted to register the courses under Honors.
- ii) The selected students shall submit their willingness to the principal through his/her parent department offering Honors. The parent department shall maintain the record of student pursuing the Honors.
- iii) The students enrolled in the Honors courses will be monitored continuously. An advisor/mentor from parent department shall be assigned to a group of students to monitor the progress.
- iv) There is no fee for registration of subjects for Honors program offered in offline at the respective institutions.

### **17. Attendance Requirements:**

- i) A student shall be eligible to appear for the end Semester examinations if he/she acquires a minimum of 40% attendance in each subject and 75% of attendance in aggregate of all the subjects. b) Condonation of shortage of attendance in aggregate up to 10% (65% and above and below 75%) in each Semester may be granted by the College Academic Committee.
- ii) Shortage of Attendance below 65% in aggregate shall in NO CASE be condoned.
- iii) A stipulated fee shall be payable towards condonation of shortage of attendance to the institution.
- iv) Students whose shortage of attendance is not condoned in any Semester are not eligible to take their end examination of that class and their registration shall stand cancelled.
- v) A student will not be promoted to the next Semester unless he satisfies the attendance requirements of the present Semester. They may seek readmission for that Semester from the date of commencement of class work.
- vi) If any candidate fulfils the attendance requirement in the present Semester, he shall not be eligible for readmission into the same class.
- vii) If the learning is carried out in blended mode (both offline & online), then the total attendance of the student shall be calculated considering the offline and online attendance of the student.
- viii) For induction program attendance shall be maintained as per AICTE norms.

### **18. Promotion Rules:**

The following academic requirements must be satisfied in addition to the attendance

requirements mentioned in section 16.

- i) A student shall be promoted from first year to second year if he/she fulfils the minimum attendance requirement as per university norms.
- ii) A student will be promoted from II to III year if he/she fulfils the academic requirement of securing 40% of the credits (any *decimal* fraction should be **rounded off to lower** digit) in the subjects that have been studied up to III Semester.
- iii) A student shall be promoted from III year to IV year if he/she fulfils the academic requirements of securing 40% of the credits (any *decimal* fraction should be **rounded off to lower** digit) in the subjects that have been studied up to V Semester. And in case a student is detained for want of credits for a particular academic year by
  - ii) & iii) above, the student may make up the credits through supplementary examinations and only after securing the required credits he/she shall be permitted to join in the V Semester or VII Semester respectively as the case may be.
- iv) When a student is detained due to lack of credits/shortage of attendance he/she may be re-admitted when the Semester is offered after fulfilment of academic regulations. In such case, he/she shall be in the academic regulations into which he/she is readmitted.

#### 19. Grading:

As a measure of the student's performance, a 10-point Absolute Grading System using the following Letter Grades and corresponding percentage of marks shall be followed:

After each course is evaluated for 100 marks, the marks obtained in each course will be converted to a corresponding letter grade as given below, depending on the range in which the marks obtained by the student fall.

#### Structure of Grading of Academic Performance

Range in which the marks in the subject fall	Grade	Grade Points
		Assigned
90 & above	S (Superior)	10
80 - 89	A (Excellent)	9
70 - 79	B (Very Good)	8
60 - 69	C (Good)	7
50 - 59	D (Average)	6
40 - 49	E (Pass)	5
< 40	F (Fail)	0
Absent	Ab (Absent)	0

- i) A student obtaining Grade ‘F’ or Grade ‘Ab’ in a subject shall be considered failed and will be required to reappear for that subject when it is offered the next supplementary examination.
- ii) For non-credit audit courses, “Satisfactory” or “Unsatisfactory” shall be indicated instead of the letter grade and this will not be counted for the computation of SGPA/CGPA/Percentage.

Computation of Semester Grade Point Average (SGPA) and Cumulative Grade Point Average (CGPA):

The Semester Grade Point Average (SGPA) is the ratio of sum of the product of the number of credits with the grade point scored by a student in all the courses taken by a student and the sum of the number of credits of all the courses undergone by a student, i.e.,

$$SGPA = \frac{\sum(C_i \times G_i)}{\sum C_i}$$

Where,  $C_i$  is the number of credits of the  $i^{\text{th}}$  subject and  $G_i$  is the grade point scored by the student in the  $i^{\text{th}}$  course.

The Cumulative Grade Point Average (CGPA) will be computed in the same manner considering all the courses undergone by a student over all the Semesters of a program, i.e.,

$$CGPA = \frac{\sum(C_i \times S_i)}{\sum C_i}$$

Where “ $S_i$ ” is the SGPA of the  $i^{\text{th}}$  Semester and  $C_i$  is the total number of credits up to that Semester.

Both SGPA and CGPA shall be rounded off to 2 decimal points and reported in the transcripts.

While computing the SGPA the subjects in which the student is awarded Zero grade points will also be included.

Grade Point: It is a numerical weight allotted to each letter grade on a 10-point scale. Letter Grade: It is an index of the performance of students in a said course. Grades are denoted by the letters S, A, B, C, D and F.

#### **Award of Class:**

After a student has satisfied the requirements prescribed for the completion of the program and is eligible for the award of B. Tech. Degree, he/she shall be placed in one of the following four classes:

<b>Class Awarded</b>	<b>CGPA Secured</b>
First Class with Distinction	$\geq 7.5$
First Class	$\geq 6.5 < 7.5$
Second Class	$\geq 5.5 < 6.5$
Pass Class	$\geq 5.0 < 5.5$

**CGPA to Percentage Conversion Formula –  $(CGPA - 0.5) \times 10$**

## 20. With-holding of Results

If the candidate has any dues not paid to the college or if any case of indiscipline or malpractice is pending against him/her, the result of the candidate shall be withheld in such cases.

## 21. Multiple Entry / Exit Option

### (a) Exit Policy:

The students can choose to exit the four-year program at the end of first/second/third year.

- i) **UG Certificate in (Field of study/discipline)** - Program duration: First year (first two Semesters) of the undergraduate program, 40 credits followed by an additional exit 10-credit bridge course(s) lasting two months, including at least 6- credit job-specific internship/ apprenticeship that would help the candidates acquire job- ready competencies required to enter the workforce.
- ii) **UG Diploma (in Field of study/discipline)** - Program duration: First two years (first four Semesters) of the undergraduate program, 80 credits followed by an additional exit 10-credit bridge course(s) lasting two months, including at least 6-credit job-specific internship/ apprenticeship that would help the candidates acquire job-ready competencies required to enter the workforce.
- iii) **Bachelor of Science (in Field of study/discipline) i.e., B.Sc. Engineering in (Field of study/discipline)**- Program duration: First three years (first six Semesters) of the undergraduate program, 120 credits.

### (b) Entry Policy:

Modalities on multiple entry by the student into the B.Tech. program will be provided by the university in due course of time.

**Note:** The College Academic council shall resolve any issues that may arise in the implementation of Multiple Entry and Exit policies from time to time and shall review the policies in the light of periodic changes brought by UGC, AICTE and State government.

## 22. Gap Year Concept:

Gap year concept for Student Entrepreneur in Residence is introduced and outstanding students who wish to pursue entrepreneurship / become entrepreneur are allowed to take a break of one year at any time after II year to pursue full-time entrepreneurship program / to establish start-ups. This period may be extended to two years at the most and these two years would not be counted for the time for the maximum time for graduation. The Head of the department shall forward such proposals submitted by the students to the principal. An evaluation committee constituted by the College Academic Council shall evaluate the proposal submitted by the student and the committee shall decide whether to permit the student(s) to avail the Gap Year or not.

### **23. Transitory Regulations**

Discontinued, detained, or failed candidates are eligible for readmission as and when the Semester is offered after fulfilment of academic regulations. Candidates who have been detained for want of attendance or not fulfilled academic requirements or who have failed after having undergone the course in earlier regulations or have discontinued and wish to continue the course are eligible for admission into the unfinished Semester from the date of commencement of class work with the same or equivalent subjects as and when subjects are offered, subject to Section 2 and they will follow the academic regulations into which they are readmitted.

Candidates who are permitted to avail Gap Year shall be eligible for re-joining into the succeeding year of their B. Tech from the date of commencement of class work, subject to Section 2 and they will follow the academic regulations into which they are readmitted.

### **24. Minimum Instruction Days for a Semester:**

The minimum instruction days including exams for each Semester shall be 90 days.

### **25. Medium of Instruction:**

The medium of instruction of the entire B. Tech undergraduate program in Engineering & Technology (including examinations and project reports) will be in English only.

### **26. Student Transfers:**

Student transfers shall be as per the guidelines issued by the Government of Andhra Pradesh and the Universities from time to time.

### **27. General Instructions:**

- i. The academic regulations should be read as a whole for purpose of any interpretation.
- ii. Malpractices rules-nature and punishments are appended.
- iii. Where the words “he”, “him”, “his”, occur in the regulations, they also include “she”, “her”, “hers”, respectively.
- iv. In the case of any doubt or ambiguity in the interpretation of the above rules, the decision of the Head of the Institution is final.
- v. The Institution may change or amend the academic regulations or syllabi at any time and the changes or amendments shall be made applicable to all the students on rolls with effect from the dates notified.
- vi. In the case of any doubt or ambiguity in the interpretation of the guidelines given, the decision of the Head of the institution is final.

\*\*\* \*\*

## **ACADEMIC REGULATIONS (R23UG)**

### **FOR B.TECH. (LATERAL ENTRY SCHEME)**

*(Effective for the students admitted into II year through Lateral Entry Scheme from the Academic Year 2024-25 onwards)*

#### **1. Award of the Degree**

- (a) Award of the B.Tech. Degree / B.Tech. Degree with a Minor if he/she fulfils the following:
  - (i) Pursues a course of study for not less than three academic years and not more than six academic years. However, for the students availing Gap year facility this period shall be extended by two years at the most and these two years would in addition to the maximum period permitted for graduation (Six years).
  - (ii) Registers for 120 credits and secures all 120 credits.
- (b) Award of B.Tech. degree with Honors if he/she fulfils the following:
  - (i) Student secures additional 15 credits fulfilling all the requisites of a B.Tech. program i.e., 120 credits.
  - (ii) Registering for Honors is optional.
  - (iii) Honors is to be completed simultaneously with B.Tech. program.

2. Students, who fail to fulfil the requirement for the award of the degree within six consecutive academic years from the year of admission, shall forfeit their seat.

#### **3. Minimum Academic Requirements**

The following academic requirements have to be satisfied in addition to the requirements mentioned in item no.2

- i. A student shall be deemed to have satisfied the minimum academic requirements and earned the credits allotted to each theory, practical, design, drawing subject or project if he secures not less than 35% of marks in the end examination and a minimum of 40% of marks in the sum total of the mid Semester evaluation and endexamination taken together.
- ii. A student shall be promoted from III year to IV year if he/she fulfils the academic requirements of securing 40% of the credits (any decimal fraction should be rounded off to lower digit) in the subjects that have been studied up to V Semester.

And in case if student is already detained for want of credits for particular academic year, the student may make up the credits through supplementary exams of the above exams before the commencement of IV year I Semester class work of next year.

## **Course Pattern**

- i) The entire course of study is three academic years on Semester pattern.
- ii) A student eligible to appear for the end examination in a subject but absent at it or has failed in the end examination may appear for that subject at the next supplementary examination offered.
- iii) When a student is detained due to lack of credits/shortage of attendance the student may be re-admitted when the Semester is offered after fulfilment of academic regulations, the student shall be in the academic regulations into which he/she is readmitted.

All other regulations as applicable for B. Tech. Four-year degree course (Regular) will hold good for B. Tech. (Lateral Entry Scheme).

## B.Tech. Course Structure (R23UG)

# **I Semester**

Course Title	LINEAR ALGEBRA & CALCULUS				B. Tech. I Sem. (Common to All Branches)			
Course Code	Category	Hours/Week			Credits	Maximum Marks		
2321101	BS&H	L	T	P	C	Continuous Internal Assessment	End Exams	Total
		3	0	0	3	30	70	100
Mid Exam Duration : 2Hrs					End Exam Duration : 3 Hrs.			
<b>Course Objectives:</b>								
<ul style="list-style-type: none"> <li>To equip the students with standard concepts and tools at an intermediate to advanced level mathematics to develop the confidence and ability among the students to handle various real-world problems and their applications.</li> </ul>								
<b>Course Outcomes:</b> On successful completion of this course, the students will be able to								
CO1	Develop and use of matrix algebra techniques that are needed by engineers for practical applications.							
CO2	Utilize mean value theorems to real life problems.							
CO3	Familiarize with functions of several variables which are useful in optimization.							
CO4	Learn important tools of calculus in higher dimensions.							
CO5	Familiarize with double and triple integrals of functions of several variables in two dimensions using Cartesian and polar coordinates and in three dimensions using cylindrical and spherical coordinates.							

### UNIT I: Matrices

Rank of a matrix by echelon form, normal form, **normal form in PAQ**. Cauchy–Binet formula (without proof). Inverse of Non- singular matrices by Gauss-Jordan method, System of linear equations: **Consistency and inconsistency of system of equations**, solving system of Homogeneous and Non-Homogeneous equations by Gauss elimination method. **Iterative Methods:** Jacobi and Gauss Seidel Iteration Methods.

### UNIT II: Eigenvalues, Eigenvectors and Orthogonal Transformation

Eigenvalues, Eigenvectors and their properties, Diagonalization of a matrix, Cayley-Hamilton Theorem (without proof), finding inverse and power of a matrix by Cayley-Hamilton Theorem, Quadratic forms, Nature, **Signature and Index** of the Quadratic Forms, Reduction of Quadratic form to canonical forms by Orthogonal Transformation.

### UNIT III: Calculus

**Basic concepts of Calculus.** Mean Value Theorems: Rolle’s Theorem, Lagrange’s mean value theorem with their geometrical interpretation, Cauchy’s mean value theorem, Taylor’s and Maclaurin’s theorems with remainders (without proof), Problems and applications on the above theorems.

### UNIT IV: Partial differentiation and Applications (Multi variable calculus)

Functions of several variables: Continuity and Differentiability, Partial derivatives, total derivatives, chain rule, Taylor’s and Maclaurin’s series expansion of functions of two variables. Jacobians, Functional dependence, maxima and minima of functions of two variables, method of Lagrange multipliers.

## **UNIT V: Multiple Integrals (Multi variable Calculus)**

Double integrals: **Evaluation of double integrals in cartesian and polar coordinates**, triple integrals, change of order of integration, change of variables to polar, cylindrical and spherical coordinates. Finding areas (by double integrals) and volumes (by double integrals and triple integrals).

### **Text Books:**

1. Higher Engineering Mathematics, B. S. Grewal, Khanna Publishers, 2017, 44<sup>th</sup> Edition.
2. Advanced Engineering Mathematics, Erwin Kreyszig, John Wiley & Sons, 2018, 10<sup>th</sup> Edition.

### **Reference Books:**

1. Thomas Calculus, George B. Thomas, Maurice D. Weir and Joel Hass, Pearson Publishers, 2018, 14<sup>th</sup> Edition.
2. Advanced Engineering Mathematics, R. K. Jain and S. R. K. Iyengar, Alpha Science International Ltd., 2021 5<sup>th</sup> Edition (9th reprint).
3. Advanced Modern Engineering Mathematics, Glyn James, Pearson publishers, 2018, 5<sup>th</sup> Edition.
4. Advanced Engineering Mathematics, Micheael Greenberg, Pearson publishers, 9<sup>th</sup> Edition.
5. Higher Engineering Mathematics, H. K Das, Er. Rajnish Verma, S. Chand Publications, 2014, Third Edition (Reprint 2021).
6. A Text Book of Engineering Mathematics, N.P. Bali and Manish Goyal, Lakshmi Publications, Reprint 2008.

Course Title	CHEMISTRY					B. Tech. I Sem. EEE, CSE & AIML		
Course Code	Category	Hours/Week			Credits	Maximum Marks		
2323102	BS&H	L	T	P	C	Continuous Internal Assessment	End Exams	Total
		3	0	0	3	30	70	100
<b>Mid Exam Duration: 2Hrs</b>					<b>End Exam Duration: 3Hrs</b>			
<b>Course Objectives:</b>								
<ul style="list-style-type: none"> <li>To familiarize engineering chemistry and its applications</li> <li>To train the students on the principles and applications of electrochemistry and polymers</li> <li>To introduce instrumental methods, molecular machines and switches.</li> </ul>								
<b>Course Outcomes:</b> On successful completion of this course, the students will be able to								
<b>CO1</b>	Explain Schrodinger Wave equation & energy level diagrams of homo and heteronuclear diatomic molecules							
<b>CO2</b>	Apply the principle of Band diagrams in the application of Semiconductors, superconductors and explain the importance of supercapacitors & nanomaterials.							
<b>CO3</b>	Compare the materials of construction for battery and electrochemical sensors							
<b>CO4</b>	Explain the preparation, properties, and applications of thermoplastics & thermosetting & elastomers conducting polymers							
<b>CO5</b>	Explain the principles of spectrometry & chromatography and its applications							

### UNIT I : Structure and Bonding Models:

Fundamentals of Quantum mechanics, Schrodinger Wave equation, significance of  $\Psi$  and  $\Psi^2$ , particle in one dimensional box, **Differences between atomic & molecular orbitals**, molecular orbital theory –bonding in homo- and heteronucleardiatomic molecules – energy level diagrams of  $O_2$ ,  $N_2$  and  $CO$ , etc.  $\pi$ -molecular orbitals of butadiene and benzene, calculation of bond order.

### UNIT II : Modern Engineering materials

Semiconductors – Introduction, basic concept, **Types-Intrinsic & Extrinsic Semiconductors**, application.

Super conductors-Introduction basic concept, applications.

Supercapacitors: Introduction, Basic Concept-Classification – Applications.

Nano materials: Introduction, classification, properties and applications of Fullerenes, carbon nano tubes and Graphines nanoparticles.

### UNIT III : Electrochemistry and Applications

Electrochemical cell, Nernst equation, **Reference Electrodes-Primary & Secondary Reference Electrodes**, cell potential calculations and numerical problems, potentiometry- potentiometric titrations (redox titrations), concept of conductivity, conductivity cell, conductometric titrations (acid-base titrations).

Electrochemical sensors – potentiometric sensors with examples, amperometric sensors with examples.

Primary cells – Zinc-air battery, Secondary cells –lithium-ion batteries, **Lead acid battery**- working of the batteries including cell reactions; Fuel cells, hydrogen-oxygen fuel cell– working of the cells. Polymer Electrolyte Membrane Fuel cells (PEMFC).

## **UNIT IV : Polymer Chemistry**

Introduction to polymers, functionality of monomers, chain growth and step growth polymerization, coordination polymerization, with specific examples and mechanisms of polymer formation.

Plastics –Thermo and Thermosetting plastics, Preparation, properties and applications of – PVC, Teflon, Bakelite, Nylon-6,6, carbon fibres.

Elastomers–Buna-S, Buna-N–preparation, properties and applications.

Conducting polymers – polyacetylene, polyaniline, – mechanism of conduction and applications.

Bio-Degradable polymers - Poly Glycolic Acid (PGA), Polyl Lactic Acid (PLA).

## **UNIT V : Instrumental Methods and Applications**

Electromagnetic spectrum. Absorption of radiation: Beer-Lambert's law. UV-Visible Spectroscopy, electronic transition, Instrumentation, IR spectroscopies, fundamental modes and selection rules, Instrumentation. Chromatography-Basic Principle, Classification-HPLC: Principle, Instrumentation and Applications., **Gas Chromatography- Principle, Instrumentation and Applications**

### **Text Books:**

1. Jain and Jain, Engineering Chemistry, 16/e, Dhanpat Rai, 2013.
2. Peter Atkins, Julio de Paula and James Keeler, Atkins' Physical Chemistry, 10/e, Oxford University Press, 2010.
3. A Text book of Engineering chemistry by Shashi Chawla, Dhanpat Rai & Co publications

### **Reference Books:**

1. Skoog and West, Principles of Instrumental Analysis, 6/e, Thomson, 2007.
2. J.D. Lee, Concise Inorganic Chemistry, 5<sup>th</sup> Edition, Wiley Publications, Feb.2008
3. Text book of Polymer Science, Fred W. Billmayer Jr, 3rd Edition
4. Principles of Instrumental Analysis, 6<sup>th</sup> edition, Douglas A. Skoog, Cengage Publications.
5. Advanced Inorganic Chemistry, Cotton F Albert, Wilkinson Geoffrey, Prism Publications
6. An Introduction to Electrochemistry, Glasstone, Arihant Publications

Course Title	BASIC CIVIL AND MECHANICAL ENGINEERING				B. Tech. I Sem. EEE, CSE & AIML			
Course Code	Category	Hours/Week			Credits	Maximum Marks		
23CM105	Engineering Science	L	T	P	C	Continuous Internal Assessment	End Exams	Total
		3	0	0	3	30	70	100
<b>Mid Exam Duration: 2Hrs</b>					<b>End Exam Duration: 3Hrs</b>			
<b>Course Objectives:</b>								
<ul style="list-style-type: none"> <li>• Get familiarized with the scope and importance of Civil and Mechanical Engineering in different sectors and industries.</li> <li>• Introduce the preliminary concepts of Building Planning, Building Construction, Materials and the related tests.</li> <li>• Acquire preliminary knowledge of surveying and understand the importance of the quality of the drinking water.</li> <li>• Explain different engineering materials and manufacturing processes.</li> <li>• Provide an overview of different thermal and mechanical systems; introduce basics of robotics and its applications.</li> </ul>								
<b>Course Outcomes:</b> On completion of the course, the student should be able to								
<b>CO1</b>	Understand various sub-divisions of Civil Engineering and to appreciate their role in ensuring better society. Know the concepts of surveying and to understand the measurement of distances, angles and levels through surveying.							
<b>CO2</b>	Realize the importance of Transportation in nation's economy and the engineering measures related to highways in terms of geometrics.							
<b>CO3</b>	Understand the importance of water resources and storage structures so that the social responsibilities of water conservation will be appreciated. Understand the different manufacturing processes and explain the basics of thermal engineering and its applications.							
<b>CO4</b>	Describe the working of different mechanical and power plants; learn basics of robotics.							
<b>CO5</b>	Analyze various power transmission systems applications.							

## PART A: BASIC CIVIL ENGINEERING

### UNIT I

**Basics of Civil Engineering:** Role of Civil Engineers in Society- Various Disciplines of Civil Engineering- Structural Engineering- Geo-technical Engineering- Transportation Engineering - Hydraulics and Water Resources Engineering - Environmental Engineering -Scope of each discipline - Building Construction and Planning- Construction Materials-Cement – Aggregate Bricks - Cement concrete- Steel-Tests on these materials.

Factors to be considered in Building Planning- Nature of Buildings- Typical Layouts of a Residential Building- Industrial Building- Commercial Building like a Supermarket / Hotel / Theatre.

## UNIT II

**Surveying:** Objectives of Surveying- Horizontal Measurements- Vertical Measurements- Angular Measurements- Leveling instruments used for leveling- Introduction to Bearings- Simple problems on leveling and bearings-Contour mapping.

## UNIT III

**Transportation Engineering, Water Resources and Environmental Engineering:** Importance of Transportation in Nation's economic development- Types of Highway Pavements- Flexible Pavements and Rigid Pavements - Simple Differences - Basic geometric design elements of a highway- Camber- Stopping Sight Distance- Super elevation- Introduction.

**Water Resources and Environmental Engineering:** Sources of water- Quality of water- Specifications and Tests- Introduction to Hydrology- Hydrograph –Rain water Harvesting- Rain water runoff- Water Storage Structures (Simple introduction to Dams and Reservoirs).

### Text Books:

1. G. Shanmugam and M.S. Palanisamy, Basic Civil and the Mechanical Engineering, TataMcGraw Hill publications (India) Pvt. Ltd.
2. Basic Civil Engineering, S.S. Bhavikatti, New Age International Publishers.
3. Engineering Materials, Dr. S.C. Rangwala, Charotar Publishing House.
4. Highway Engineering, S.K. Khanna, C.E.G. Justo and Veeraraghavan, Nemchand andBrothers Publications.
5. Irrigation Engineering and Hydraulic Structures - Santosh Kumar Garg, Khanna Publishers, Delhi.
6. Building Construction, Dr. B. C. Punmia, Lakshmi Publications, Delhi.

### Reference Books:

1. Surveying, Vol- I and Vol-II, S.K. Duggal, Tata McGraw Hill Publishers.
2. Hydrology and Water Resources Engineering, Santosh Kumar Garg, KhannaPublishers, Delhi.

## PART B: BASIC MECHANICAL ENGINEERING

### UNIT I:

**Introduction to Mechanical Engineering:** Role of Mechanical Engineering in Industries and Society- Technologies in different sectors such as Energy, Manufacturing, Automotive, Aerospace, and Marine sectors.

**Engineering Materials** - Metals-Ferrous and Non-ferrous, Ceramics, Composites, Smart materials.

### UNIT II

**Manufacturing Processes:** Principles of Casting, Forming, joining processes, Machining, Introduction to CNC machines, 3D printing, and Smart manufacturing.

**Thermal Engineering** – working principle of Boilers, Otto cycle, Diesel cycle, Refrigeration and air-conditioning cycles, IC engines, 2-Stroke and 4-Stroke engines, SI/CI Engines, Components of Electric and Hybrid Vehicles.

### **UNIT III**

**Power plants** – working principle of Steam, Diesel, Hydro, Nuclear power plants. **Mechanical Power Transmission** - Belt Drives, Chain, Rope drives, Gear Drives and their applications.

**Introduction to Robotics** - Joints & links, configurations, and applications of robotics.

(Note: The subject covers only the basic principles of Civil and Mechanical Engineering systems. The evaluation shall be intended to test only the fundamentals of the subject)

#### **Text Books:**

1. Internal Combustion Engines by V. Ganesan, By Tata McGraw Hill publications (India) Pvt.Ltd.
2. A Text book of Theory of Machines by S.S. Rattan, Tata McGraw Hill Publications,(India) Pvt. Ltd.
3. An introduction to Mechanical Engineering by Jonathan Wicker and Kemper Lewis, Cengage Learning India Pvt. Ltd.

#### **Reference Books:**

1. Appuu Kuttan KK, Robotics, I.K. International Publishing House Pvt. Ltd. Volume-I.
2. 3D printing & Additive Manufacturing Technology- L. Jyothish Kumar, Pulak MPandey, Springer publications.
3. Thermal Engineering by Mahesh M Rathore Tata McGraw Hill publications (India) Pvt.Ltd.
4. G. Shanmugam and M.S. Palanisamy, Basic Civil and the Mechanical Engineering, Tata McGraw Hill publications (India) Pvt. Ltd.

Course Title	INTRODUCTION TO PROGRAMMING				B. Tech. I Sem. EEE, CSE & AIML			
Course Code	Category	Hours/Week			Credits	Maximum Marks		
2305107	Engineering Science	L	T	P	C	Continuous Internal Assessment	End Exams	Total
		3	0	0	3	30	70	100
<b>Mid Exam Duration: 2Hrs</b>					<b>End Exam Duration: 3Hrs</b>			
<b>Course Objectives:</b>								
<ul style="list-style-type: none"> <li>To introduce students to the fundamentals of computer programming.</li> <li>To provide hands-on experience with coding and debugging.</li> <li>To foster logical thinking and problem-solving skills using programming.</li> <li>To familiarize students with programming concepts such as data types, control structures, functions, and arrays.</li> <li>To encourage collaborative learning and teamwork in coding projects.</li> </ul>								
<b>Course Outcomes:</b> A student after completion of the course will be able to								
<b>CO1</b>	Understand basics of computers, the concept of algorithm and algorithmic thinking.							
<b>CO2</b>	Analyse a problem and develop an algorithm to solve it.							
<b>CO3</b>	Implement various algorithms using the C programming language.							
<b>CO4</b>	Understand more advanced features of C language.							
<b>CO5</b>	Develop problem-solving skills and the ability to debug and optimize the code.							

### UNIT I : Introduction to Programming and Problem Solving

**History of Computers, Basic organization of a computer:** ALU, input-output units, memory, program counter, Introduction to Programming Languages, Program Development Life Cycle, Basics of a Computer Program Algorithms, flowcharts (Using Dia Tool), pseudo code. Introduction to Compilation and Execution, Primitive Data Types, Variables, and Constants, Basic Input and Output, Operations, Type Conversion, and Casting.

**Problem solving techniques:** Algorithmic approach, characteristics of algorithm.

**Problem solving strategies:** Top-down approach, Bottom-up approach, Time and space complexities of algorithms.

### UNIT II : Control Structures

Simple sequential programs Conditional Statements (if, if-else, switch), Loops (for, while, dowhile) Break and Continue. Go to statement, Nested Loops.

### UNIT III : Arrays and Strings

Arrays indexing, memory model, programs with array of integers, two dimensional arrays, Introduction to Strings. String handling functions, and Command line arguments.

### UNIT IV : Pointers & User Defined Data types

Pointers, dereferencing and address operators, pointer and address arithmetic, array manipulation using pointers, Dynamic Memory Allocation, Storage classes – auto, register, static, extern.

User-defined data types-Structures and Unions.

### **UNIT V : Functions & File Handling**

Introduction to Functions, Function Declaration and Definition, Function call Return Types and Arguments, Parameter Passing techniques, Recursion, modifying parameters inside functions using pointers, arrays as parameters. Scope and Lifetime of Variables, Basics of File Handling.

**Note:** The syllabus is designed with C Language as the fundamental language of implementation.

#### **Text Books:**

1. "The C Programming Language", Brian W. Kernighan and Dennis M. Ritchie, Prentice-Hall, 1988
2. Schaum's Outline of Programming with C, Byron S Gottfried, McGraw-Hill Education, 1996
3. Computer Science: A Structured Programming Approach Using C 3rd Edition by Behrouz A. Forouzan, Richard F. Gilberg)

#### **Reference Books:**

1. Computing fundamentals and C Programming, Balagurusamy, E., McGraw-Hill Education, 2008.
2. Programming in C, Rema Theraja, Oxford, 2016, 2nd edition.
3. C Programming, A Problem Solving Approach, Forouzan, Gilberg, Prasad, CENGAGE, 3rd edition.

Course Title	IT WORKSHOP				B. Tech. I Sem. EEE, CSE & AIML			
Course Code	Category	Hours/Week			Credits	Maximum Marks		
2305109	Engineering Science	L	T	P	C	Continuous Internal Assessment	End Exams	Total
		0	0	2	1	30	70	100
					<b>End Exam Duration: 3Hrs</b>			
<b>Course Objectives:</b>								
<ul style="list-style-type: none"> <li>To introduce the internal parts of a computer, peripherals, I/O ports, connecting cables.</li> <li>To demonstrate configuring the system as Dual boot both Windows and other Operating Systems Viz. Linux, BOSS.</li> <li>To teach basic command line interface commands on Linux.</li> <li>To teach the usage of Internet for productivity and self-paced life-long learning.</li> <li>To introduce Compression, Multimedia and Antivirus tools and Office Tools such as Word processors, Spread sheets and Presentation tools.</li> </ul>								
<b>Course Outcomes:</b>								
<b>CO1</b>	Perform Hardware troubleshooting.							
<b>CO2</b>	Understand Hardware components and inter dependencies.							
<b>CO3</b>	Safeguard computer systems from viruses/worms.							
<b>CO4</b>	Document/ Presentation preparation.							
<b>CO5</b>	Perform calculations using spreadsheets.							

### PC Hardware & Software Installation

**Task 1:** Identify the peripherals of a computer, components in a CPU and its functions. Draw the block diagram of the CPU along with the configuration of each peripheral and submit to your instructor.

**Task 2:** Student should disassemble and assemble the PC back to working condition. Lab instructors should verify the work and follow it up with a Viva. Also students need to go through the video which shows the process of assembling a PC. A video would be given as part of the course content.

**Task 3:** Student should individually install MS windows on the personal computer. Lab instructor should verify the installation and follow it up with a Viva.

**Task 4:** Student should install Linux on the computer. This computer should have windows installed. The system should be configured as dual boot (VMWare) with both Windows and Linux. Lab instructors should verify the installation and follow it up with a Viva.

**Task 5:** Student should install BOSS on the computer. The system should be configured as dual boot (VMWare) with both Windows and BOSS. Lab instructors should verify the installation and follow it up with a Viva.

## **Internet & World Wide Web**

**Task 1:** Orientation & Connectivity Boot Camp: Students should get connected to their Local Area Network and access the Internet. In the process they configure the TCP/IP setting. Finally, students should demonstrate, to the instructor, how to access the websites and email. If there are no internet connectivity preparations need to be made by the instructors to simulate the WWW on the LAN.

**Task 2:** Web Browsers, Surfing the Web: Students customize their web browsers with the LAN proxy settings, bookmarks, search toolbars and pop-up blockers. Also, plug-ins like Macromedia Flash and JRE for applets should be configured.

**Task 3:** Search Engines & Netiquette: Students should know what search engines are and how to use the search engines. A few topics would be given to the students for which they need to search on Google. This should be demonstrated to the instructors by the student.

**Task 4:** Cyber Hygiene: Students would be exposed to the various threats on the internet and would be asked to configure their computer to be safe on the internet. They need to customize their browsers to block pop ups, block active x downloads to avoid viruses and/or worms.

## **LaTeX and WORD**

**Task 1 – Word Orientation:** The mentor needs to give an overview of La TeX and Microsoft (MS) office or equivalent (FOSS) tool word: Importance of La TeX and MS office or equivalent (FOSS) tool Word as word Processors, Details of the four tasks and features that would be covered in each, Using La TeX and word – Accessing, overview of toolbars, saving files, Using help and resources, rulers, format painter in word.

**Task 2:** Using La TeX and Word to create a project certificate. Features to be covered:- Formatting Fonts in word, Drop Cap in word, Applying Text effects, Using Character Spacing, Borders and Colors, Inserting Header and Footer, Using Date and Time option in both La TeXand Word.

**Task 3:** Creating project abstract Features to be covered:- Formatting Styles, Inserting table, Bullets and Numbering, Changing Text Direction, Cell alignment, Footnote, Hyperlink, Symbols, Spell Check, Track Changes.

**Task 4:** Creating a Newsletter: Features to be covered:- Table of Content, Newspaper columns, Images from files and clipart, Drawing toolbar and Word Art, Formatting Images, Textboxes, Paragraphs and Mail Merge in word.

## **EXCEL**

**Excel Orientation:** The mentor needs to tell the importance of MS office or equivalent (FOSS) tool Excel as a Spreadsheet tool, give the details of the four tasks and features that would be covered in each. Using Excel – Accessing, overview of toolbars, saving excel files, Using help and resources.

**Task 1:** Creating a Scheduler - Features to be covered: Gridlines, Format Cells, Summation, auto fill, Formatting Text

**Task 2:** Calculating GPA -. Features to be covered:- Cell Referencing, Formulae in excel – average, std. deviation, Charts, Renaming and Inserting worksheets, Hyper linking, Count function,

## **LOOKUP/VLOOKUP**

**Task 3:** Split cells, freeze panes, group and outline, Sorting, Boolean and logical operators, Conditional formatting

## POWER POINT

**Task 1:** Students will be working on basic power point utilities and tools which help them create basic power point presentations. PPT Orientation, Slide Layouts, Inserting Text, Word Art, Formatting Text, Bullets and Numbering, Auto Shapes, Lines and Arrows in PowerPoint.

**Task 2:** Interactive presentations - Hyperlinks, Inserting –Images, Clip Art, Audio, Video, Objects, Tables and Charts.

**Task 3:** Master Layouts (slide, template, and notes), Types of views (basic, presentation, slide slotter, notes etc), and Inserting – Background, textures, Design Templates, Hidden slides.

## ADOBE PHOTOSHOP

**Task 1:** Scanning images, editing their resolution and size, learning about bitmap and vector images, creating new images, and placing files are the basic concepts that are covered here.

**Task 2:** The students learn about the colour modes, colour management, colour mode conversion, colour picker functions, etc., in this module.

**Task 3:** An exposure to painting tools, brush tools, pencils, erasers, magic erasers, blending modes, etc.

## AI TOOLS – ChatGPT

**Task 1:** Prompt Engineering: Experiment with different types of prompts to see how the model responds. Try asking questions, starting conversations, or even providing incomplete sentences to see how the model completes them.

- Ex: Prompt: "You are a knowledgeable AI. Please answer the following question: What is the capital of France?"

**Task 2:** Creative Writing: Use the model as a writing assistant. Provide the beginning of a story or a description of a scene, and let the model generate the rest of the content. This can be a fun way to brainstorm creative ideas

- Ex: Prompt: "In a world where gravity suddenly stopped working, people started floating upwards. Write a story about how society adapted to this new reality."

**Task 3:** Language Translation: Experiment with translation tasks by providing a sentence in one language and asking the model to translate it into another language. Compare the output to see how accurate and fluent the translations are.

- Ex: Prompt: "Translate the following English sentence to French: 'Hello, how are you doing today?'"

<b>Course Objectives:</b>								
<ul style="list-style-type: none"> <li>To verify the fundamental concepts with experiments.</li> <li>The student will have exposure to various experimental skills and hand-on experience which is very essential for an Engineering student.</li> </ul>								
<b>Course Outcomes:</b> At the end of the course, the students will be able to								
CO1	Determine the cell constant, redox potentials and conductance of solutions.							
CO2	Prepare advanced polymer Bakelite materials							
CO3	Measure the strength of an acid present in secondary batteries & copper in given sample							
CO4	Analyse the IR spectra of some organic compounds & verify Beer Lamberts law							
CO5	Calculate different parameters in water sample							

**Note: In the following list, out of 13 experiments, any 10 experiments must be performed in a Semester**

**List of Experiments:**

- Measurement of 10Dq by spectrophotometric method
- Conductometric titration of strong acid vs. strong base
- Conductometric titration of weak acid vs. strong base
- Determination of cell constant and conductance of solutions
- Potentiometry - determination of redox potentials and emfs
- Determination of Strength of an acid in Pb-Acid battery
- Preparation of a Bakelite
- Verify Lambert-Beer's law
- Wavelength measurement of sample through UV-Visible Spectroscopy
- Identification of simple organic compounds by IR
- Preparation of nanomaterials by precipitation method
- Estimation of Ferrous Iron by Dichrometry.
- Estimation of Hardness of Water by EDTA Method**
- Determination of Dissolved Oxygen present in Water sample by Winkler's method.**
- Estimation of Copper by EDTA Method**
- Determine the strength of chlorides present in water sample by AgNO<sub>3</sub> solution**

**Text Books:**

- Vogel's Text book of Quantitative Chemical Analysis, J. Mendham et.al., Pearson Education, Sixth Edition, 2012.

2. Laboratory manual on Engineering Chemistry, Anupama Rajput, Dhanpat Rai & Co Publications.
3. Essentials of Experimental Engineering Chemistry, Shashi Chawla, Dhanpat Rai & Co Publications.

**Reference Books:**

1. Practical Engineering Chemistry by K. Mukkanti, et al, B.S. Publications, Hyderabad.
2. Instrumental methods of chemical analysis, Chatwal, Anand, Himalaya Publications.
3. Essentials of Physical Chemistry, Bhal& Tuli. (S. Chand Publications).
4. Advanced Inorganic Analysis, Agarwal & Keemtilal (Pragati prakashan)

Course Title	Engineering Workshop				B. Tech. I Sem. EEE, CSE & AIML			
Course Code	Category	Hours/Week			Credits	Maximum Marks		
2303112	BS&H	L	T	P	C	Continuous Internal Assessment	End lab Exams	Total
		0	0	3	1.5	30	70	100
					<b>End Exam Duration: 3Hrs</b>			
<b>Course Objectives:</b>								
➤ To familiarize students with wood working, sheet metal operations, fitting and electrical house wiring skills								
<b>Course Outcomes:</b>								
CO1	Identify workshop tools and their operational capabilities.							
CO2	Practice on manufacturing of components using workshop trades including fitting, carpentry, and foundry and welding							
CO3	Apply fitting operations in various applications.							
CO4	Apply basic electrical engineering knowledge for House Wiring Practice							
CO5								

1. **Demonstration:** Safety practices and precautions to be observed in workshop.
2. **Wood Working:** Familiarity with different types of woods and tools used in woodworking and make following joints.
  - (a) Half– Lap joint
  - (b) Mortise and Tenon joint
  - (c) Corner Dovetail joint or Bridle joint
3. **Sheet Metal Working:** Familiarity with different types of tools used in sheet metalworking, Developments of following sheet metal job from GI sheets.
4. **Fitting:** Familiarity with different types of tools used in fitting and do the following fitting exercises.
  - (a) V-fit
  - (b) Dovetail fit
  - (c) Semi-circular fit
  - (d) Bicycle tire puncture and change of two-wheeler tyre
5. **Electrical Wiring:** Familiarity with different types of basic electrical circuits and make the following connections.
  - (a) Paralleland series
  - (b) Two-way switch
  - (c) Godown lighting
  - (d) Tube light
  - (e) Three phase motor
  - (f) Soldering of wires
6. **Foundry Trade:** Demonstration and practice on Moulding tools and processes, Preparation of Green Sand Moulds for given Patterns.
7. **Welding Shop:** Demonstration and practice on Arc Welding and Gas welding. Preparation of Lap joint and Butt joint.
8. **Plumbing:** Demonstration and practice of Plumbing tools, Preparation of Pipe joints with coupling for same diameter and with reducer for different diameters.

**Text Books:**

1. Basic Workshop Technology: Manufacturing Process, Felix W.; Independently Published, 2019. Workshop Processes, Practices and Materials; Bruce J. Black, Routledge publishers, 5th Edn. 2015.

					<b>End Exam Duration: 3Hrs</b>			
<b>Course Objectives:</b>								
➤ The course aims to give students hands – on experience and train them on the concepts of the C-programming language								
<b>Course Outcomes:</b>								
CO1	Read, understand, and trace the execution of programs written in C language.							
CO2	Select the right control structure for solving the problem.							
CO3	Develop C programs which utilize memory efficiently using programming constructs.							
CO4	Develop, Debug and Execute programs to demonstrate the applications of arrays and functions.							
CO5	Develop, Debug and Execute programs to demonstrate the applications of basic concepts of pointers and Structures in C							

## UNIT I

### WEEK 1

**Objective:** Getting familiar with the programming environment on the computer and writing the first program.

**Suggested Experiments/Activities:**

**Tutorial 1:** Problem-solving using Computers.

**Lab1:** Familiarization with programming environment

i) Basic Linux environment and its editors like Vi, Vim & Emacs etc., **MS-DOS**

**Environment and its commands.**

ii) Exposure to Turbo C, gcc

iii) Writing simple programs using printf(), scanf()

### WEEK 2

**Objective:** Getting familiar with how to formally describe a solution to a problem in a series of finite steps both using textual notation and graphic notation.

**Suggested Experiments /Activities:**

**Tutorial 2:** Problem-solving using Algorithms and Flow charts.

**Lab 1:** Converting algorithms/flow charts into C Source code.

**Developing the algorithms/flowcharts for the following sample programs**

i) Sum and average of 3 numbers

ii) Conversion of Fahrenheit to Celsius and vice versa

iii) Simple interest calculation

iv) Finding area of circle

### WEEK 3

**Objective:** Learn how to define variables with the desired data-type, initialize them with

appropriate values and how arithmetic operators can be used with variables and constants.

**Suggested Experiments/Activities:**

**Tutorial 3:** Variable types and type conversions:

**Lab 3:** Simple computational problems using arithmetic expressions.

- i) Finding the square root of a given number
- ii) Finding compound interest
- iii) Area of a triangle using heron's formulae
- iv) Distance travelled by an object
- v) Find out  $e=mc^2$

## UNIT II

### WEEK 4

**Objective:** Explore the full scope of expressions, type-compatibility of variables & constants and operators used in the expression and how operator precedence works.

**Suggested Experiments/Activities:**

**Tutorial4:** Operators and the precedence and as associativity:

**Lab4:** Simple computational problems using the operator' precedence and associativity

**i) Evaluate the following expressions.**

- a.  $A+B*C+(D*E) + F*G$
- b.  $A/B*C-B+A*D/3$
- c.  $A+++B---A$
- d.  $J= (i++) + (++i)$

**ii)** Find the maximum of three numbers using conditional operator

**iii)** Take marks of 5 subjects in integers, and find the total, average in float

### WEEK 5

**Objective:** Explore the full scope of different variants of “if construct” namely if-else, nullelse, if-else if\*-else, switch and nested-if including in what scenario each one of them can be used and how to use them. Explore all relational and logical operators while writing conditionals for “if construct”.

**Suggested Experiments/Activities:**

**Tutorial 5:** Branching and logical expressions:

**Lab 5:** Problems involving if-then-else structures.

- i) Write a C program to find the max and min of four numbers using if-else.
- ii) Write a C program to generate electricity bill.
- iii) Find the roots of the quadratic equation.
- iv) Write a C program to simulate a calculator using switch case.
- v) Write a C program to find the given year is a leap year or not.
- vi) Write a C program to find out the given number is even or odd.
- vii) Write a C program to find out the given phone number is valid or not.
- viii) Write a C program to find out the given number is positive or negative.

### WEEK 6

**Objective:** Explore the full scope of iterative constructs namely while loop, do-while loop and for loop in addition to structured jump constructs like break and continue including when each of these statements is more appropriate to use.

**Suggested Experiments/Activities:**

**Tutorial 6:** Loops, while and for loops

**Lab 6:** Iterative problems e.g., the sum of series

- i) Find the factorial of given number using any loop.

- ii) Find the given number is a prime or not.
- iii) Compute sine and cos series
- iv) Checking a number palindrome
- v) Construct a pyramid of numbers.
- vi) Find out sum of individual digits of a given positive integer
- vii) Find out the given number is strong number or not.

## UNIT III

### WEEK 7:

**Objective:** Explore the full scope of Arrays construct namely defining and initializing 1-D and 2-D and more generically n-D arrays and referencing individual array elements from the defined array. Using integer 1-D arrays, explore search solution linear search.

#### **Suggested Experiments/Activities:**

**Tutorial 7:** 1 D Arrays: searching.

**Lab 7:** 1D Array manipulation, linear search

- i) Find the min and max of a 1-D integer array.
- ii) Perform linear search on 1D array.
- iii) The reverse of a 1D integer array
- iv) Find 2's complement of the given binary number.
- v) Eliminate duplicate elements in an array.
- vi) Find out smallest and biggest element in an 1D Float Array.
- vii) Count frequency of each element.

### WEEK 8:

**Objective:** Explore the difference between other arrays and character arrays that can be used as Strings by using null character and get comfortable with string by doing experiments that will reverse a string and concatenate two strings. Explore sorting solution bubble sort using integer arrays.

#### **Suggested Experiments/Activities:**

**Tutorial 8:** 2 D arrays, sorting and Strings.

**Lab 8:** Matrix problems, String operations, Bubble sort

- i) Addition of two matrices
- ii) Multiplication two matrices
- iii) Sort array elements using bubble sort
- iv) Concatenate two strings without built-in functions
- v) Reverse a string using built-in and without built-in string functions
- vi) String palindrome or not

## UNIT IV

### WEEK 9:

**Objective:** Explore pointers to manage a dynamic array of integers, including memory allocation & value initialization, resizing changing and reordering the contents of an array and memory de-allocation using malloc (), calloc (), realloc () and free () functions. Gain experience processing command-line arguments received by C

#### **Suggested Experiments/Activities:**

**Tutorial 9:** Pointers, structures and dynamic memory allocation

**Lab 9:** Pointers and structures, memory dereference.

- i) Write a C program to find the sum of a 1D array using malloc()
- ii) Write a C program to find the total, average of n students using structures
- iii) Enter n students data using calloc() and display failed students list

- iv) Read student name and marks from the command line and display the student details along with the total.
- v) Write a C program to implement realloc()
- vi) C program to calculate employee gross salary using structures

## WEEK 10:

**Objective:** Experiment with C Structures, Unions, bit fields and self-referential structures (Singly linked lists) and nested structures

**Suggested Experiments/Activities:**

**Tutorial 10:** Bitfields, Self-Referential Structures, Linked lists

**Lab10 :** Bitfields, linked lists

Read and print a date using dd/mm/yyyy format using bit-fields and differentiate the same without using bit- fields

- i) Create and display a singly linked list using self-referential structure.
- ii) Demonstrate the differences between structures and unions using a C program.
- iii) Write a C program to shift/rotate using bitfields.
- iv) Write a C program to copy one structure variable to another structure of the same type.
- v) Demonstrate nested structures using a C program.

## UNIT V

### WEEK 11:

**Objective:** Explore the Functions, sub-routines, scope and extent of variables, doing some experiments by parameter passing using call by value. Basic methods of numerical integration

**Suggested Experiments/Activities:**

**Tutorial 11:** Functions, call by value, scope and extent,

**Lab 11:** Simple functions using call by value, solving differential equations using Eulers theorem.

- i) Write a C function to calculate NCR value.
- ii) Write a C function to find the length of a string.
- iii) Write a C function to transpose of a matrix.
- iv) Write a C function to demonstrate numerical integration of differential equations using Euler's method

### WEEK 12:

**Objective:** Explore how recursive solutions can be programmed by writing recursive functions that can be invoked from the main by programming at-least five distinct problems that have naturally recursive solutions.

**Suggested Experiments/Activities:**

**Tutorial 12:** Recursion, the structure of recursive calls

**Lab 12:** Recursive functions

- i) Write a recursive function to generate Fibonacci series.
- ii) Write a recursive function to find the lcm of two numbers.
- iii) Write a recursive function to find the factorial of a number.
- iv) Write a C Program to implement Ackermann function using recursion.
- v) Write a recursive function to find the sum of series.
- vi) Write a program in C to calculate the sum of numbers from 1 to n using recursion

### **WEEK 13:**

**Objective:** Explore the basic difference between normal and pointer variables, Arithmetic operations using pointers and passing variables to functions using pointers

#### **Suggested Experiments/Activities:**

**Tutorial 13:** Call by reference, dangling pointers

**Lab 13:** Simple functions using Call by reference, Dangling pointers.

- i) Write a C program to swap two numbers using call by reference.
- ii) Demonstrate Dangling pointer problem using a C program.
- iii) Write a C program to copy one string into another using pointer.
- iv) Write a C program to find no of lowercase, uppercase, digits and other characters using pointers.

### **WEEK14:**

**Objective:** To understand data files and file handling with various file I/O functions. Explore the differences between text and binary files.

#### **Suggested Experiments/Activities:**

**Tutorial 14:** File handling

**Lab 14:** File operations

- i) Write a C program to write and read text into a file.
- ii) Write a C program to write and read text into a binary file using fread() and fwrite()
- iii) Copy the contents of one file to another file.
- iv) Write a C program to merge two files into the third file using command-line arguments.
- v) Find no. of lines, words and characters in a file
- vi) Write a C program to print last n characters of a given file.

#### **Text Books:**

1. Ajay Mittal, Programming in C: A practical approach, Pearson.
2. Byron Gottfried, Schaum's Outline of Programming with C, McGraw Hill.

#### **Reference Books:**

2. C Programming, A Problem-Solving Approach, Forouzan, Gilberg, Prasad, CENGAGE

Course Title	HEALTH AND WELLNESS, YOGA AND SPORTS				B. Tech. I Sem. EEE, CSE & AIML			
Course Code	Category	Hours/Week			Credits	Maximum Marks		
2306117	BS&H	L	T	P	C	Continuous Internal Assessment	End Exams	Total
		0	0	1	0.5			
					<b>6 X 15 = 90 + 10 Viva voce</b>			
<b>Course Objectives:</b>								
➤ The main objective of introducing this course is to make the students maintain their mental and physical wellness by balancing emotions in their life. It mainly enhances the essential traits required for the development of the personality.								
<b>Course Outcomes:</b> After completion of the course the student will be able to								
CO1	Understand the importance of yoga and sports for Physical fitness and sound health.							
CO2	Demonstrate an understanding of health-related fitness components.							
CO3	Compare and contrast various activities that help enhance their health.							
CO4	Assess current personal fitness levels.							
CO5	Develop Positive Personality.							

### UNIT I

Concept of health and fitness, Nutrition and Balanced diet, basic concept of immunity Relationship between diet and fitness, Globalization and its impact on health, Body Mass Index(BMI) of all age groups.

#### Activities:

- i) Organizing health awareness programmes in community
- ii) Preparation of health profile
- iii) Preparation of chart for balance diet for all age groups

### UNIT II

Concept of yoga, need for and importance of yoga, origin and history of yoga in Indian context, classification of yoga, Physiological effects of Asanas- Pranayama and meditation, stress management and yoga, Mental health and yoga practice.

#### Activities:

Yoga practices – Asana, Kriya, Mudra, Bandha, Dhyana, Surya Namaskar

### UNIT III

Concept of Sports and fitness, importance, fitness components, history of sports, Ancient and Modern Olympics, Asian games and Commonwealth games.

#### Activities:

- i) Participation in one major game and one individual sport viz., Athletics, Volleyball, Basketball, Handball, Football, Badminton, Kabaddi, Kho-kho, Table tennis, Cricket etc. Practicing general and specific warm up, aerobics
- ii) Practicing cardiorespiratory fitness, treadmill, run test, 9 min walk, skipping and running.

**Reference Books:**

1. Gordon Edlin, Eric Golanty. Health and Wellness, 14th Edn. Jones & Bartlett Learning, 2022
2. T.K.V.Desikachar. The Heart of Yoga: Developing a Personal Practice
3. Archie J.Bahm. Yoga Sutras of Patanjali, Jain Publishing Company, 1993
4. Wiseman, John Lofty, SAS Survival Handbook: The Ultimate Guide to Surviving Anywhere Third Edition, William Morrow Paperbacks, 2014
5. The Sports Rules Book/ Human Kinetics with Thomas Hanlon. -- 3rd ed. Human Kinetics, Inc. 2014

**General Guidelines:**

1. Institutes must assign slots in the Timetable for the activities of Health/Sports/Yoga.
2. Institutes must provide field/facility and offer the minimum of five choices of as many as Games/Sports.
3. Institutes are required to provide sports instructor / yoga teacher to mentor the students.

**Evaluation Guidelines:**

- Evaluated for a total of 100 marks.
- A student can select 6 activities of his/her choice with a minimum of 01 activity per unit. Each activity shall be evaluated by the concerned teacher for 15 marks, totalling to 90 marks.
- A student shall be evaluated by the concerned teacher for 10 marks by conducting viva-voce on the subject.

## **II Semester**

Course Title	Differential Equations and Vector Calculus				B. Tech. II Sem. (Common to All Branches)			
Course Code	Category	Hours/Week			Credits	Maximum Marks		
2321201	BS&H	L	T	P	C	Continuous Internal Assessment	End Exams	Total
		3	0	0	3	30	70	100
<b>Mid Exam Duration: 2 Hrs</b>					<b>End Exam Duration: 3 Hours</b>			
<b>Course Objectives:</b>								
<ul style="list-style-type: none"> <li>To enlighten the learners in the concept of differential equations and Multi Variable Calculus.</li> <li>To furnish the learners with basic concepts and techniques at plus two level to lead them into advanced level by handling various real-world applications</li> </ul>								
<b>Course Outcomes:</b> On successful completion of this course, the students will be able to								
<b>CO1</b>	Solve the first order differential equations related to various engineering fields.							
<b>CO2</b>	Solve the second and higher differential equations related to various engineering fields.							
<b>CO3</b>	Identify solution methods for partial differential equations that model physical processes.							
<b>CO4</b>	Interpret the physical meaning of different operators such as gradient, curl and divergence.							
<b>CO5</b>	Estimate the work done against a field, circulation and flux using vector calculus.							

### UNIT I: Differential equations of first order and first degree

Linear differential equations – Bernoulli's equations- Exact equations and equations reducible to exact form. Applications: Newton's Law of cooling – Law of natural growth and decay- Electrical circuits.

### UNIT II: Linear differential equations of higher order (Constant Coefficients)

Definitions, homogenous and non-homogenous, complementary function, general solution, particular integral of the type  $e^{ax}$ ,  $\sin ax$ ,  $\cos ax$ , polynomials in  $x$ ,  $e^{ax} V(x)$ ,  $x^n V(x)$ , Wronskian, Method of variation of parameters. Simultaneous linear equations, Applications to **L-R Circuit** and L-C-R Circuit problems and Simple Harmonic motion.

### UNIT III: Partial Differential Equations

Introduction and formation of Partial Differential Equations by elimination of arbitrary constants and arbitrary functions, solutions of first order linear equations using Lagrange's method. Homogeneous Linear Partial differential equations with constant coefficients.

### UNIT IV: Vector differentiation

Scalar and vector point functions, vector operator Del, Del applies to scalar point functions-Gradient, Directional derivative, **Solenoidal and Irrotational vectors**, del applied to vector point functions-Divergence and Curl, vector identities.

### UNIT V: Vector integration

Line integral-circulation-work done - **Scalar Potential**, surface integral-flux, Green's theorem in

the plane (without proof), Stoke's theorem (without proof), volume integral, Divergence theorem (without proof) and related problems.

**Text Books:**

1. Higher Engineering Mathematics, B. S. Grewal, Khanna Publishers, 2017, 44th Edition
2. Advanced Engineering Mathematics, Erwin Kreyszig, John Wiley & Sons, 2018, 10th Edition.

**Reference Books:**

1. Thomas Calculus, George B. Thomas, Maurice D. Weir and Joel Hass, Pearson Publishers, 2018, 14th Edition.
2. Advanced Engineering Mathematics, Dennis G. Zill and Warren S. Wright, Jones and Bartlett, 2018.
3. Advanced Modern Engineering Mathematics, Glyn James, Pearson publishers, 2018, 5<sup>th</sup> Edition.
4. Advanced Engineering Mathematics, R. K. Jain and S. R. K. Iyengar, Alpha Science International Ltd., 2021 5<sup>th</sup> Edition (9th reprint).
5. Higher Engineering Mathematics, B. V. Ramana, McGraw Hill Education, 2017
6. A Text Book of Engineering Mathematics, N.P. Bali and Manish Goyal, Lakshmi Publications, Reprint 2008.

Course Title	COMMUNICATIVE ENGLISH				B. Tech. II Sem. EEE, CSE & AIML			
Course Code	Category	Hours/Week			Credits	Maximum Marks		
2324201	BS&H	L	T	P	C	Continuous Internal Assessment	End Exams	Total
		2	0	0	2	30	70	100
<b>Mid Exam Duration: 2Hrs</b>					<b>End Exam Duration: 3Hrs</b>			
<b>COURSE OBJECTIVES</b>								
1	Facilitate effective listening, Reading, Speaking and Writing skills among the students							
2	Enhances the same in their comprehending abilities, oral presentations, reporting useful information and providing knowledge of grammatical structures and vocabulary							
3	Provide knowledge of grammatical structures and vocabulary and encourage their appropriate use in speech and writing							
4	Helps the students to make them effective in speaking and writing skills and to make them industry ready.							
5	Impart effective strategies for good writing and demonstrate the same in summarizing, writing well organized essays, record and report useful information							
<b>COURSE OUTCOMES</b>								
<b>CO1</b>	<b>Understand</b> the context, topic, and pieces of specific information from social or transactional dialogues.							
<b>CO2</b>	<b>Apply</b> grammatical structures to formulate sentences and correct word forms.							
<b>CO3</b>	<b>Analyze</b> discourse markers to speak clearly on a specific topic in informal discussions							
<b>CO4</b>	<b>Evaluate</b> reading / listening texts and to write summaries based on global comprehension of these texts.							
<b>CO5</b>	<b>Create</b> a coherent paragraph, essay, and resume.							

## UNIT I

**Lesson** : **HUMAN VALUES:** Gift of Magi (Short Story)

**Listening** : Identifying the topic, the context and specific pieces of information by listening to short audio texts and answering a series of questions.

**Speaking** : Asking and answering general questions on familiar topics such as home, family, work, studies and interests; introducing oneself and others.

**Reading** : Skimming to get the main idea of a text; scanning to look for specific pieces of information.

**Writing** : Mechanics of Writing-Capitalization, Spellings, Punctuation-Parts of Sentences.

**Grammar** : Parts of Speech, Basic Sentence Structures-forming questions

**Vocabulary:** Synonyms, Antonyms, Affixes (Prefixes/Suffixes), Root words, **One word Substitutes.**

## UNIT II

**Lesson** : **NATURE:** The Brook by Alfred Tennyson (Poem)

**Listening** : Answering a series of questions about main ideas and supporting ideas after listening to audio texts.

**Speaking** : Discussion in pairs/small groups on specific topics followed by short structure talks.

- Reading** : Identifying sequence of ideas; recognizing verbal techniques that help to link the ideas in a paragraph together.
- Writing** : Structure of a paragraph - Paragraph writing (specific topics) Grammar: Cohesive devices - linkers, use of articles and zero article; prepositions.
- Vocabulary:** Homonyms, Homophones, Homographs, **Idioms and Phrases.**

### UNIT III

- Lesson** : **BIOGRAPHY:** Elon Musk
- Listening** : Listening for global comprehension and summarizing what is listened to.
- Speaking** : Discussing specific topics in pairs or small groups and reporting what is discussed
- Reading** : Reading a text in detail by making basic inferences -recognizing and interpreting specific context clues; strategies to use text clues for comprehension.
- Writing** : Summarizing, Note-making, paraphrasing
- Grammar** : Verbs - tenses; subject-verb agreement; Compound words, Collocations, **Question Tags**
- Vocabulary:** Compound words, Collocations

### UNIT IV

- Lesson** : **INSPIRATION:** The Toys of Peace by Saki
- Listening** : Making predictions while listening to conversations/ transactional dialogues without video; listening with video.
- Speaking** : Role plays for practice of conversational English in academic contexts (formal and informal) - asking for and giving information/directions.
- Reading** : Studying the use of graphic elements in texts to convey information, reveal trends / patterns / relationships, communicate processes or display complicated data.
- Writing** : Letter Writing: Official Letters, Resumes and **Technical Report Writing**
- Grammar** : Reporting verbs, Direct & Indirect speech, Active & Passive Voice
- Vocabulary:** Words often confused, Jargons

### UNIT V

- Lesson** : **MOTIVATION:** The Power of Intrapersonal Communication (An Essay)
- Listening** : Identifying key terms, understanding concepts and answering a series of relevant questions that test comprehension.
- Speaking** : Formal oral presentations on topics from academic contexts
- Reading** : Reading comprehension.
- Writing** : Writing structured essays on specific topics.
- Grammar** : Editing short texts –identifying and correcting common errors in grammar and usage (articles, prepositions, tenses, subject verb agreement) **Graphic Presentation**
- Vocabulary:** Technical Jargons

Course Title	Data Structures				B. Tech. CSE & AIML (II Sem.)			
Course Code	Category	Hours/Week			Credits	Maximum Marks		
2305202	Professional Core	L	T	P	C	Continuous Internal Assessment	End Exams	Total
		3	0	0	3	30	70	100
<b>Mid Exam Duration: 2Hrs</b>					<b>End Exam Duration: 3Hrs</b>			
<b>Course Objectives:</b>								
<ul style="list-style-type: none"> <li>➤ To provide the knowledge of basic data structures and their implementations.</li> <li>➤ To understand importance of data structures in context of writing efficient programs.</li> <li>➤ To develop skills to apply appropriate data structures in problem solving.</li> </ul>								
<b>Course Outcomes:</b> At the end of the course, Student will be able to								
<b>CO1</b>	Explain the role of linear data structures in organizing and accessing data efficiently in algorithms.							
<b>CO2</b>	Design, implement, and apply linked lists for dynamic data storage, demonstrating understanding of memory allocation.							
<b>CO3</b>	Develop programs using stacks to handle recursive algorithms, manage program states, and solve related problems.							
<b>CO4</b>	Apply queue-based algorithms for efficient task scheduling and breadth-first traversal in graphs and distinguish between dequeues and priority queues, and apply them appropriately to solve data management challenges.							
<b>CO5</b>	Devise novel solutions to small scale programming challenges involving data structures such as stacks, queues, Trees.							
<b>CO6</b>	Recognize scenarios where hashing is advantageous, and design hash-based solutions for specific problems.							

## UNIT I

**Introduction to Linear Data Structures:** Definition and importance of linear data structures, Abstract data types (ADTs) and their implementation, Overview of time and space complexity analysis for linear data structures. Searching Techniques: Linear & Binary Search, Sorting Techniques: Bubble sort, Selection sort, Insertion Sort

## UNIT II

**Linked Lists:** Singly linked lists: representation and operations, doubly linked lists and circular linked lists, comparing arrays and linked lists, Applications of linked lists.

## UNIT III

**Stacks:** Introduction to stacks: properties and operations, implementing stacks using arrays and linked lists, Applications of stacks in expression evaluation, backtracking, reversing list etc.

## UNIT IV

**Queues:** Introduction to queues: properties and operations, implementing queues using arrays and linked lists, Applications of queues in breadth-first search, scheduling, etc.

**Dequeues:** Introduction to dequeues (double-ended queues), Operations on dequeues and their applications.

## UNIT V

Trees: Introduction to Trees, Binary Search Tree – Insertion, Deletion & Traversal

**Hashing:** Brief introduction to hashing and hash functions, Collision resolution techniques: chaining and open addressing, Hash tables: basic implementation and operations, Applications of hashing in unique identifier generation, caching, etc.

### Text Books:

1. Data Structures and algorithm analysis in C, Mark Allen Weiss, Pearson, 2<sup>nd</sup> Edition.
2. Fundamentals of data structures in C, Ellis Horowitz, Sartaj Sahni, Susan Anderson-Freed, Silicon Press, 2008

### Reference Books:

1. Algorithms and Data Structures: The Basic Toolbox by Kurt Mehlhorn and Peter Sanders
2. C Data Structures and Algorithms by Alfred V. Aho, Jeffrey D. Ullman, and John E. Hopcroft
3. Problem Solving with Algorithms and Data Structures" by Brad Miller and David Ranum
4. Introduction to Algorithms by Thomas H. Cormen, Charles E. Leiserson, Ronald L. Rivest, and Clifford Stein
5. Algorithms in C, Parts 1-5 (Bundle): Fundamentals, Data Structures, Sorting, Searching, and Graph Algorithms" by Robert Sedgewick

Course Title	ENGINEERING PHYSICS				B. Tech. II Sem. EEE, CSE & AIML			
Course Code	Category	Hours/Week			Credits	Maximum Marks		
2322204	BS&H	L	T	P	C	Continuous Internal Assessment	End Exams	Total
		3	0	0	3	30	70	100
Mid Exam Duration: 2Hrs					End Exam Duration: 3Hrs			
<b>Course Objectives:</b>								
<ul style="list-style-type: none"> <li>To bridge the gap between the Physics in school at 10+2 level and UG level engineering courses by identifying the importance of the optical phenomenon like interference, diffraction etc,</li> <li>Enlightening the periodic arrangement of atoms in crystalline solids and concepts of quantum mechanics.</li> <li>Introduce novel concepts of dielectric and magnetic materials, physics of semiconductors.</li> </ul>								
<b>Course Outcomes:</b>								
CO1	Analyze the intensity variation of light due to interference, diffraction and polarization							
CO2	Familiarize with the basics of crystals and their structures							
CO3	Summarize various types of polarization of dielectrics and classify the magnetic materials.							
CO4	Explain fundamentals of quantum mechanics and apply to one dimensional motion of particles.							
CO5	Identify the type of semiconductor using Hall Effect.							

### UNIT I : Wave Optics

**Interference:** Introduction- Principle of superposition –Interference of light –**Conditions for sustained Interference**-Interference in thin films (Reflection Geometry) & applications - Colors in thin films- Newton’s Rings- Determination of wavelength and refractive index. **Diffraction:** Introduction-Fresnel and Fraunhofer diffractions- Fraunhofer diffraction due to single slit, double slit & N-slits (Qualitative) – Diffraction Grating - Dispersive power and resolving power of Grating (Qualitative)- **Engineering applications of diffraction.**

**Polarization:** Introduction-Types of polarization- Polarization by reflection, refraction and Double refraction - Nicol’s Prism -Half wave and Quarter wave plates- **Engineering applications of polarization.**

### UNIT II : Crystallography and X-ray diffraction

**Crystallography: Introduction** - Space lattice, Basis, Unit Cell and lattice parameters – Bravais Lattices – crystal systems (3D) – coordination number - packing fraction of SC, BCC & FCC - Miller indices – separation between successive (hkl) planes.

**X-ray diffraction: Introduction** - Bragg’s law - X-ray Diffractometer – crystal structure determination by Laue’s and powder methods- **applications.**

### **UNIT III : Dielectric and Magnetic Materials**

**Dielectric Materials:** Introduction - Dielectric polarization - Dielectric polarizability, Susceptibility, Dielectric constant and Displacement Vector – Relation between the electric vectors-Types of polarizations-Electronic (Quantitative), Ionic (Quantitative) and Orientation polarizations (Qualitative) - Lorentz internal field - Clausius-Mossotti equation - complex dielectric constant – Frequency dependence of polarization – dielectric loss- **applications.**

**Magnetic Materials:** Introduction - Magnetic dipole moment - Magnetization-Magnetic susceptibility and permeability – Atomic origin of magnetism - Classification of magnetic materials: Dia, Para, Ferro, Anti-Ferro & Ferri magnetic materials - Domain concept for Ferro magnetism & Domain walls (Qualitative)-Hysteresis-soft and hard magnetic materials- **applications.**

### **UNIT IV : Quantum Mechanics and Free electron theory**

**Quantum Mechanics:** Introduction – Dual nature of matter–Heisenberg’s Uncertainty Principle – Significance and properties of wave function – Schrodinger’s time independent and dependent wave equations– Particle in a one-dimensional infinite potential well- **applications.**

**Free Electron Theory:** Introduction - Classical free electron theory (Qualitative with discussion of merits and demerits) – Quantum free electron theory– electrical conductivity based on quantum free electron theory - Fermi-Dirac distribution - Density of states - Fermi energy.

### **UNIT V : Semiconductors**

**Semiconductors:** Introduction - Formation of energy bands – classification of crystalline solids - Intrinsic semiconductors: Density of charge carriers – Electrical conductivity– Fermi level– Extrinsic semiconductors: density of charge carriers – dependence of Fermi energy on carrier concentration and temperature -Drift and diffusion currents–Einstein’s equation–**Direct and indirect band gap of semiconductors**-Hall effect and its applications-**Formation of p-n junction.**

#### **Text Books:**

1. A Text book of Engineering Physics - M.N. Avadhanulu, P.G.Kshirsagar & TVS Arun Murthy, S. Chand Publications, 11th Edition 2019.
2. Engineering Physics-D.K. Bhattacharya and Poonam Tandon, Oxford press (2015).

#### **Reference Books:**

1. Engineering Physics - B.K. Pandey and S.Chaturvedi, Cengage Learning
2. Engineering Physics - Shatendra Sharma, Jyotsna Sharma, Pearson Education, 2018.
3. Engineering Physics - Sanjay D. Jain, D. Sahasrabudhe and Girish, University Press.
4. Engineering Physics - M.R. Srinivasan, New Age international publishers (2009).

Course Title	Basic Electrical & Electronics Engineering				B. Tech. II Sem. EEE, CSE & AIML			
Course Code	Category	Hours/Week			Credits	Maximum Marks		
23EE206	Engineering Science	L	T	P	C	Continuous Internal Assessment	End Exams	Total
		3	0	0	3	30	70	100
<b>Mid Exam Duration: 2Hrs</b>					<b>End Exam Duration: 3Hrs</b>			
<b>Course Objectives:</b>								
➤ To expose to the field of electrical & electronics engineering, laws and principles of electrical/ electronic engineering and to acquire fundamental knowledge in the relevant field.								
<b>Course Outcomes:</b> O\After the completion of this course students will be able to								
<b>CO1</b>	Remember the fundamental laws, operating principles of motors, generators, MC and MI instruments.							
<b>CO2</b>	Understand the problem solving concepts associated to AC and DC circuits, construction and operation of AC and DC machines, measuring instruments; different power generation mechanisms, Electricity billing concept and important safety measures related to electrical operations.							
<b>CO3</b>	Apply mathematical tools and fundamental concepts to derive various equations related to machines, circuits and measuring instruments; electricity bill calculations and layout representation of electrical power systems.							
<b>CO4</b>	Analyze different electrical circuits, performance of machines and measuring instruments.							
<b>CO5</b>	Evaluate different circuit configurations, Machine performance and Power systems operation.							

## PART A: BASIC ELECTRICAL ENGINEERING

### UNIT I : DC & AC Circuits

**DC Circuits:** Electrical circuit elements (R, L and C), Ohm's Law and its limitations, KCL & KVL, series, parallel, series-parallel circuits, Super Position theorem, Simple numerical problems.

**AC Circuits:** A.C. Fundamentals: Equation of AC Voltage and current, waveform, time period, frequency, amplitude, phase, phase difference, average value, RMS value, form factor, peakfactor, Voltage and current relationship with phasor diagrams in R, L, and C circuits, Concept of Impedance, Active power, reactive power and apparent power, Concept of power factor (Simple Numerical problems).

### UNIT II : Machines and Measuring Instruments

**Machines:** Construction, principle and operation of (i) DC Motor, (ii) DC Generator, (iii) Single Phase Transformer, (iv) Three Phase Induction Motor and (v) Alternator, Applications of electrical machines.

**Measuring Instruments:** Construction and working principle of Permanent Magnet Moving Coil (PMMC), Moving Iron (MI) Instruments and Wheat Stone bridge.

### UNIT III : Energy Resources, Electricity Bill & Safety Measures

**Energy Resources:** Conventional and non-conventional energy resources; Layout and operation of various Power Generation systems: Hydel, Nuclear, Solar & Wind power generation.

**Electricity Bill:** Power rating of household appliances including air conditioners, PCs, Laptops, Printers, etc. Definition of “unit” used for consumption of electrical energy, two-part electricity tariff, calculation of electricity bill for domestic consumers.

**Equipment Safety Measures:** Working principle of Fuse and Miniature circuit breaker (MCB), merits and demerits. Personal safety measures: Electric Shock, Earthing and its types, Safety Precautions to avoid shock.

#### Text Books:

1. Basic Electrical Engineering, D. C. Kulshreshtha, Tata McGraw Hill, 2019, First Edition
2. Power System Engineering, P.V. Gupta, M.L. Soni, U.S. Bhatnagar and A. Chakrabarti, Dhanpat Rai & Co, 2013
3. Fundamentals of Electrical Engineering, Rajendra Prasad, PHI publishers, 2014, Third Edition

#### Reference Books:

1. Basic Electrical Engineering, D. P. Kothari and I. J. Nagrath, Mc Graw Hill, 2019, Fourth Edition
2. Principles of Power Systems, V.K. Mehtha, S.Chand Technical Publishers, 2020
3. Basic Electrical Engineering, T. K. Nagsarkar and M. S. Sukhija, Oxford University Press, 2017
4. Basic Electrical and Electronics Engineering, S. K. Bhattacharya, Person Publications, 2018, Second Edition.

2. <https://nptel.ac.in/courses/108108076>

## PART B: BASIC ELECTRONICS ENGINEERING

<b>Course Objectives:</b> ➤ To understand the principles of digital electronics, basics of semiconductor devices like diodes & transistors, characteristics and its applications.	
<b>Course Outcomes:</b> On successful completion of this course, the students will be able to	
<b>CO1</b>	Understand the working mechanism of diodes, transistors, logic gates, different combinational, sequential circuits and their role in the digital systems.
<b>CO2</b>	Apply diodes, transistors in the electronic circuits and number systems, logic gates, Boolean algebra in logic circuits.
<b>CO3</b>	Analyze the circuits with diodes, transistors and logic circuits with logic gates.

### UNIT I : SEMI CONDUCTOR DEVICES

Introduction - Evolution of electronics – Vacuum tubes to nano electronics Characteristics of PN Junction Diode — Zener Effect — Zener Diode and its Characteristics. Bipolar Junction

Transistor — CB, CE, CC Configurations and Characteristics — Elementary Treatment of Small Signal CE Amplifier.

## **UNIT II : BASIC ELECTRONIC CIRCUITS AND INSTRUMENTATION**

Rectifiers and power supplies: Block diagram description of a dc power supply, working of a full wave bridge rectifier, capacitor filter (no analysis), working of simple Zener voltage regulator. Amplifiers: Block diagram of Public Address system, Circuit diagram and working of common emitter (RC coupled) amplifier with its frequency response. Electronic Instrumentation: Block diagram of an electronic instrumentation system.

## **UNIT III : DIGITAL ELECTRONICS**

Overview of Number Systems, Logic gates including Universal Gates, BCD codes, Excess-3code, Gray code, Hamming code. Boolean Algebra, Basic Theorems and properties of Boolean Algebra, Truth Tables and Functionality of Logic Gates—NOT, OR, AND, NOR, NAND, XOR and XNOR. Simple combinational circuits—Half and Full Adder, Introduction to sequential circuits, Flip flops, Registers and counters (Elementary Treatment only)

### **Text Books:**

1. R.L. Boylestad & Louis Nashlesky, Electronic Devices & Circuit Theory, Pearson Education, 2021.
2. R. P. Jain, Modern Digital Electronics, 4<sup>th</sup> Edition, Tata McGraw Hill, 2009

### **Reference Books:**

1. R.S. Sedha, A Text book of Electronic Devices and Circuits, S. Chand & Co, 2010.
2. Santiram Kal, Basic Electronics-Devices, Circuits and IT Fundamentals, Prentice Hall, India, 2002.
3. R.T. Paynter, Introductory Electronic

Course Title	Engineering Graphics				B. Tech. II Sem. EEE, CSE & AIML			
Course Code	Category	Hours/Week			Credits	Maximum Marks		
2303208	Engineering Science	L	T	P	C	Continuous Internal Assessment	End Exams	Total
		1	0	4	3	30	70	100
<b>Mid Exam Duration: 2Hrs</b>					<b>End Exam Duration: 3Hrs</b>			
<b>Course Objectives:</b> The students completing the course are expected to: <ul style="list-style-type: none"> <li>○ Understand the basic principles and conventions of engineering drawing use engineering instruments and draw engineering curves.</li> <li>○ Use orthographic projections and make the students draw the projections of lines and planes inclined to both the planes.</li> <li>○ Draw the projections of the solids in different positions with respect to the reference planes.</li> <li>○ Understand the importance of sectioning and concept of development of surfaces.</li> <li>○ Represent and convert isometric views to orthographic views and vice versa.</li> </ul>								
<b>Course Outcomes:</b> On completion of the course, the student should be able to								
<b>CO1</b>	Understand the principles of engineering drawing, including engineering curves, scales, orthographic and isometric projections.							
<b>CO2</b>	Draw and interpret orthographic projections of points, lines, planes and solids in front, top and side views.							
<b>CO3</b>	Apply concepts of sectional views to represent details of solids in simple positions.							
<b>CO4</b>	Gain a clear understanding of the principles behind development of surfaces and to understand how to unfold basic geometric shapes into flat patterns.							
<b>CO5</b>	Develop the ability to draw isometric views and orthographic views and should be able to convert isometric views to orthographic views and vice versa.							

## UNIT I

**Introduction:** Lines, Lettering and Dimensioning, Geometrical Constructions and Constructing regular polygons by general methods.

**Curves:** construction of ellipse, parabola and hyperbola by general, Cycloids, Involutives, Normal and tangent to Curves.

**Scales:** Plain scales, diagonal scales and vernier scales.

## UNIT II

**Orthographic Projections:** Reference plane, importance of reference lines or Plane, Projections of a point situated in any one of the four quadrants.

**Projections of Straight Lines:** Projections of straight lines parallel to both reference planes, perpendicular to one reference plane and parallel to other reference plane, inclined to one reference plane and parallel to the other reference plane. Projections of Straight Line Inclined to both the reference planes

**Projections of Planes:** regular planes Perpendicular to both reference planes, parallel to one

reference plane and inclined to the other reference plane; plane inclined to both the reference planes.

### UNIT III

**Projections of Solids:** Types of solids: Polyhedra and Solids of revolution. Projections of solids in simple positions: Axis perpendicular to horizontal plane, Axis perpendicular to vertical plane and Axis parallel to both the reference planes, Projection of Solids with axis inclined to one reference plane and parallel to other and axes inclined to both the reference planes.

### UNIT IV

**Sections of Solids:** Perpendicular and inclined section planes, Sectional views and True shape of section, Sections of solids in simple position only.

**Development of Surfaces:** Methods of Development: Parallel line development and radial line development. Development of a cube, prism, cylinder, pyramid and cone.

### UNIT V

**Conversion of Views:** Conversion of isometric views to orthographic views; Conversion of orthographic views to isometric views.

**Computer graphics:** Creating 2D&3D drawings of objects including PCB and Transformations using Auto CAD (*Not for end Examination*).

#### Text Books:

1. N. D. Bhatt, Engineering Drawing, Charotar Publishing House, 2016.
2. K. Vengopal Engineering Drawing & Graphics.2018
3. Harwinder Singh Engineering Drawing & Computer Graphics.2016

#### Reference Books:

Course Title	Data Structures Lab				B. Tech. CSE & AIML (II Sem.)			
Course Code	Category	Hours/Week			Credits	Maximum Marks		
2305203	PC	L	T	P	C	Continuous Internal Assessment	End Exams	Total
		0	0	3	1.5	30	70	100
					<b>End Exam Duration: 3Hrs</b>			
<b>Course Objectives:</b>								
<ul style="list-style-type: none"> <li>➤ The course aims to strengthen the ability of the students to identify and apply the suitable data structure for the given real-world problem. It enables them to gain knowledge in practical applications of data structures.</li> </ul>								
<b>Course Outcomes:</b> At the end of the course, Student will be able to								
<b>CO1</b>	Explain the role of linear data structures in organizing and accessing data efficiently in algorithms.							
<b>CO2</b>	Design, implement, and apply linked lists for dynamic data storage, demonstrating understanding of memory allocation.							
<b>CO3</b>	Develop programs using stacks to handle recursive algorithms, manage program states, and solve related problems.							
<b>CO4</b>	Apply queue-based algorithms for efficient task scheduling and breadth-first traversal in graphs and distinguish between dequeues and priority queues and apply them appropriately to solve data management challenges.							
<b>CO5</b>	Recognize scenarios where hashing is advantageous, and design hash-based solutions for specific problems.							

### List of Experiments:

#### Exercise 1: Array Manipulation

- i) Write a program to reverse an array.
- ii) C Programs to implement the Searching Techniques – Linear & Binary Search
- iii) C Programs to implement Sorting Techniques – Bubble, Selection and Insertion Sort

#### Exercise 2: Linked List Implementation

- i) Implement a singly linked list and perform insertion and deletion operations.
- ii) Develop a program to reverse a linked list iteratively and recursively.
- iii) Solve problems involving linked list traversal and manipulation.

#### Exercise 3: Linked List Applications

- i) Create a program to detect and remove duplicates from a linked list.
- ii) Implement a linked list to represent polynomials and perform addition.
- iii) Implement a double-ended queue (deque) with essential operations.

#### Exercise 4: Double Linked List Implementation

- i) Implement a doubly linked list and perform various operations to understand its properties and applications.
- ii) Implement a circular linked list and perform insertion, deletion, and traversal.

#### Exercise 5: Stack Operations

- i) Implement a stack using arrays and linked lists.
- ii) Write a program to evaluate a postfix expression using a stack.
- iii) Implement a program to check for balanced parentheses using a stack.

**Exercise 6: Queue Operations**

- i) Implement a queue using arrays and linked lists.
- ii) Develop a program to simulate a simple printer queue system.
- iii) Solve problems involving circular queues.

**Exercise 7: Stack and Queue Applications**

- i) Use a stack to evaluate an infix expression and convert it to postfix.
- ii) Create a program to determine whether a given string is a palindrome or not.
- iii) Implement a stack or queue to perform comparison and check for symmetry.

**Exercise 8: Binary Search Tree**

- i) Implementing a BST using Linked List.
- ii) Traversing of BST.

**Exercise 9: Hashing**

- i) Implement a hash table with collision resolution techniques.
- ii) Write a program to implement a simple cache using hashing.

**Text Books:**

1. Data Structures and algorithm analysis in C, Mark Allen Weiss, Pearson, 2<sup>nd</sup> Edition.
2. Fundamentals of data structures in C, Ellis Horowitz, Sartaj Sahni, Susan Anderson-Freed, Silicon Press, 2008

**Reference Books:**

1. Algorithms and Data Structures: The Basic Toolbox by Kurt Mehlhorn and Peter Sanders
2. C Data Structures and Algorithms by Alfred V. Aho, Jeffrey D. Ullman, and John E. Hopcroft
3. Problem Solving with Algorithms and Data Structures" by Brad Miller and David Ranum
4. Introduction to Algorithms by Thomas H. Cormen, Charles E. Leiserson, Ronald L. Rivest, and Clifford Stein
5. Algorithms in C, Parts 1-5 (Bundle): Fundamentals, Data Structures, Sorting, Searching, and Graph Algorithms by Robert Sedgewick.

Course Title	COMMUNICATIVE ENGLISH LAB				B. Tech. II Sem. EEE, CSE & AIML			
Course Code	Category	Hours/Week			Credits	Maximum Marks		
2324210	BS&H	L	T	P	C	Continuous Internal Assessment	End Exams	Total
		0	0	2	1	30	70	100
					<b>End Exam Duration: 3Hrs</b>			
<b>Course Objectives</b>								
<ul style="list-style-type: none"> <li>• Students will be exposed to a variety of self-instructional, learner friendly modes of language learning.</li> <li>• The students will get trained in basic communication skills and also make them ready to face job interviews.</li> <li>• Students will learn better pronunciation through stress, intonation and rhythm.</li> <li>• Students will be initiated into greater use of the computer in resume preparation, report writing, format making etc.</li> </ul>								
<b>Course Outcomes</b>								
CO1	<b>Understand</b> the different aspects of the English language proficiency with emphasis on LSRW skills.							
CO2	<b>Apply</b> communication skills through various language learning activities.							
CO3	<b>Analyze</b> the English speech sounds, stress, rhythm, intonation and syllable division for better listening and speaking comprehension.							
CO4	<b>Evaluate</b> and exhibit professionalism in participating in debates and group discussions.							
CO5	<b>Create</b> effective Course Objectives:							

### List of Topics:

1. Vowels & Consonants
2. Neutralization/Accent Rules
3. Communication Skills & JAM
4. Role Play or Conversational Practice
5. E-mail Writing
6. Resume Writing, Cover letter, SOP
7. Group Discussions-methods & practice
8. Debates - Methods & Practice
9. PPT Presentations/ Poster Presentation
10. Interviews Skills
11. Listening Skills
12. Describing Objects

### **Suggested Software:**

- Walden Infotech
- Young India Films

Course Title	Electrical & Electronics Engineering Workshop				B. Tech. II Sem. EEE, CSE & AIML			
Course Code	Category	Hours/Week			Credits	Maximum Marks		
23EE214	Engineering Science	L	T	P	C	Continuous Internal Assessment	End Exams	Total
		0	0	3	1.5	30	70	100
					<b>End Exam Duration: 3Hrs</b>			
<b>Course Objectives:</b> To impart knowledge on the principles of digital electronics and fundamentals of electron devices & its applications.								
<b>Course Outcomes:</b> On successful completion of this course, the students will be able to								
<b>CO1</b>	Identify & testing of various electronic components.							
<b>CO2</b>	Understand the usage of electronic measuring instruments.							
<b>CO3</b>	Plot and discuss the characteristics of various electronic devices.							
<b>CO4</b>	Explain the operation of a digital circuit.							

### Activities:

- Familiarization of commonly used Electrical & Electronic Workshop Tools: Breadboard, Solder, cables, relays, switches, connectors, fuses, Cutter, plier, screwdriver set, wire stripper, flux, knife / blade, soldering iron, de-soldering pump etc.
  - Provide some exercises so that hard ware tools and instruments are learned to be used by the students.
- Familiarization of Measuring Instruments like Voltmeters, Ammeters, multimeter, LCR-Q meter, Power Supplies, CRO, DSO, Function Generator, Frequency counter.
  - Provide some exercises so that measuring instruments are learned to be used by the students.
- Components:
  - Familiarization / Identification of components (Resistors, Capacitors, Inductors, Diodes, transistors, IC's etc.) – Functionality, type, size, colour coding package, symbol, cost etc.
  - Testing of components like Resistor, Capacitor, Diode, Transistor, IC set, Compare values of components like resistors, inductors, capacitors etc with the measured values by using instruments.

## PART A: ELECTRICAL ENGINEERING LAB

### List of experiments:

- Verification of KCL and KVL
- Verification of Superposition theorem
- Measurement of Resistance using Wheat stone bridge
- Magnetization Characteristics of DC shunt Generator
- Measurement of Power and Power factor using Single-phase wattmeter
- Measurement of Earth Resistance using Megger
- Calculation of Electrical Energy for Domestic Premises
- OC and SC tests on single phase transformer
- Brake test on DC Shunt Motor

## **PARTB: ELECTRONICS ENGINEERING LAB**

### **List of Experiments:**

1. Plot V-I characteristics of PN Junction diode A) Forward bias B) Reverse bias.
2. Plot V-I characteristics of Zener Diode and its application as voltage Regulator.
3. Implementation of half wave and full wave rectifiers.
4. Plot Input & Output characteristics of BJT in CE and CB configurations
5. Frequency response of CE amplifier.
6. Simulation of RC coupled amplifier with the design supplied
7. Verification of Truth Table of AND, OR, NOT, NAND, NOR, Ex-OR, Ex-NOR gates using ICs.
8. Verification of Truth Tables of S-R, J-K & D flip flops using respective ICs.

Tools / Equipment Required: DC Power supplies, Multimeters, DC Ammeters, DC Voltmeters, AC Voltmeters, CROs, all the required active devices.

### **Reference Books:**

1. R.L. Boylestad & Louis Nashlesky, Electronic Devices & Circuit Theory, Pearson education, 2021.
2. R. P. Jain, Modern Digital Electronics, 4<sup>th</sup> Edition, Tata Mc Graw Hill, 2009.
3. R.T. Paynter, Introductory Electronic Devices & Circuits–Conventional Flow Version, Pearson Education, 2009.

**Note:** Minimum Six Experiments to be performed. All the experiments shall be implemented using both Hardware and Software.

Course Title	ENGINEERING PHYSICS LAB				B. Tech. II Sem. EEE, CSE & AIML			
Course Code	Category	Hours/Week			Credits	Maximum Marks		
2322215	BSC	L	T	P	C	Continuous Internal Assessment	End Exams	Total
		0	0	2	1	30	70	100
					<b>End Exam Duration: 3Hrs</b>			
<b>Course Objectives:</b>								
<ul style="list-style-type: none"> <li>➤ To study the concepts of optical phenomenon like interference, diffraction etc., recognize the importance of energy gap in the study of conductivity and Hall effect in semiconductors and study the parameters and applications of dielectric and magnetic materials by conducting experiments.</li> </ul>								
<b>Course Outcomes:</b>								
CO1	Operate optical instruments like travelling microscope and spectrometer.							
CO2	Estimate the wavelengths of different colors using diffraction grating.							
CO3	Plot the intensity of the magnetic field of circular coil carrying current with distance.							
CO4	Evaluate dielectric constant and magnetic susceptibility for dielectric and magnetic materials respectively.							
CO5	Calculate the band gap of a given semiconductor. Identify the type of semiconductor using Hall Effect.							

#### List of Experiments:

1. Determination of radius of curvature of a given Plano convex lens by Newton's rings.
2. Determination of wavelengths of different spectral lines in mercury spectrum using Diffraction grating in normal incidence on figuration.
3. Verification of Brewster's law
4. Determination of dielectric constant using charging and discharging method.
5. Study the variation of B versus H by magnetizing the magnetic material (B-H curve).
6. Determination of wavelength of Laser light using diffraction grating.
7. Estimation of Planck's constant using photo electric effect.
8. Determination of the resistivity of semiconductors by four probe methods.
9. Determination of energy gap of a semiconductor using p-n junction diode.
10. Magnetic field along the axis of a current carrying circular coil by Stewart Gee's Method.
11. Determination of Hall voltage and Hall coefficient of a given semiconductor using Hall Effect.
12. Determination of temperature coefficients of a thermistor.
13. Determination of acceleration due to gravity and radius of Gyration by using a compound pendulum.
14. Determination of magnetic susptibility by Kundt's tube method.
15. Determination of rigidity modulus of the material of the given wire using Torsional pendulum.
16. Sonometer: Verification of laws of stretched string.
17. Determination of young's modulus for the given material of wooden scale by non- uniform bending (or double cantilever) method.
18. Determination of Frequency of electrically maintained tuning fork by Melde's experiment.
19. Fraunhoffer diffraction due to single slit.

**Note:** Any **TEN** of the listed experiments are to be conducted. Out of which any **TWO** Experiments may be conducted in virtual mode.

**Text Books:**

1. A Text book of Practical Physics-S.Balasubramanian, M.N.Srinivasan, S.Chand Publishers, 2017.
2. Practical Physics by [K.Venugopalan](#) (Author), [Vimal Saraswat](#) (Author), Himanshu Publications (1 January 2018)

**Reference Books:**

1. Lab manual Physics, R Rangarajan, R P Manchanda, R K Gupta, Rajesh Kumar Neena Sinha- New Saraswati House.
2. Practical Physics by Kumar P. R. Sasi, Prentice-Hall of India Pvt. Ltd

Course Title	NSS / NCC / SCOUTS & GUIDES / COMMUNITY SERVICE				B. Tech. II Sem. EEE, CSE & AIML			
Course Code	Category	Hours/Week			Credits	Maximum Marks		
2306216	BS&H	L	T	P	C	Continuous Internal Assessment	End Exams	Total
		0	0	1	0.5			
					<b>6 X 15 = 90 + 10 Viva voce</b>			
<b>Course Objectives:</b>								
➤ The objective of introducing this course is to impart discipline, character, fraternity, teamwork, social consciousness among the students and engaging them in selfless service.								
<b>Course Outcomes:</b> After completion of the course the students will be able to								
<b>CO1</b>	Understand the importance of discipline, character and service motto.							
<b>CO2</b>	Solve some societal issues by applying acquired knowledge, facts, and techniques.							
<b>CO3</b>	Explore human relationships by analyzing social problems.							
<b>CO4</b>	Determine to extend their help for the fellow beings and downtrodden people.							
<b>CO5</b>	Develop leadership skills and civic responsibilities.							

### UNIT I : Orientation

General Orientation on NSS/NCC/ Scouts & Guides/Community Service activities, career guidance.

#### Activities:

- i) Conducting –ice breaking sessions-expectations from the course-knowing personal talents and skills
- ii) Conducting orientations programs for the students –future plans-activities-releasing roadmap etc.
- iii) Displaying success stories-motivational biopics- award winning movies on societal issues etc.
- iv) Conducting talent show in singing patriotic songs-paintings- any other contribution.

### UNIT II : Nature & Care Activities:

- i) Best out of waste competition.
- ii) Poster and signs making competition to spread environmental awareness.
- iii) Recycling and environmental pollution article writing competition.
- iv) Organizing Zero-waste day.
- v) Digital Environmental awareness activity via various social media platforms.
- vi) Virtual demonstration of different eco-friendly approaches for sustainable living.
- vii) Write a summary on any book related to environmental issues.

### UNIT III : Community Service Activities:

- i) Conducting One Day Special Camp in a village contacting village-area leaders- Survey in the village, identification of problems- helping them to solve via media- authorities-experts-etc.
- ii) Conducting awareness programs on Health-related issues such as General Health, Mental health, Spiritual Health, HIV/AIDS,
- iii) Conducting consumer Awareness. Explaining various legal provisions etc.
- iv) Women Empowerment Programmes- Sexual Abuse, Adolescent Health and Population Education.

- v) Any other programmes in collaboration with local charities, NGOs etc.

4. Masters G. M., Joseph K. and Nagendran R. “Introduction to EnvironmentalEngineering and Science”, Pearson Education, New Delhi. 2/e 2007
5. Ram Ahuja. *Social Problems in India*, Rawat Publications, New Delhi.

**General Guidelines:**

1. Institutes must assign slots in the Timetable for the activities.
2. Institutes are required to provide instructor to mentor the students.

**Evaluation Guidelines:**

- Evaluated for a total of 100 marks.
- A student can select 6 activities of his/her choice with a minimum of 01 activity per unit. Each activity shall be evaluated by the concerned teacher for 15 marks, totalling to 90 marks.
- A student shall be evaluated by the concerned teacher for 10 marks by conducting vivavoce on the subject.

## **III Semester**

## DISCRETE MATHEMATICS AND GRAPH THEORY

(Common to CSE&AIML (III SEMESTER)

(Open Elective / Inter Disciplinary Elective / Professional Elective)

Course Code	Category	Hours/Week			Credits	Maximum Marks		
		L	T	P		Continuous Internal Assessment	Sem.-End Exam	Total
23HS302	Basic Sciences (BS)	3	0	--	3	30	70	100
		Mid Exam Duration: 2 Hrs					Sem.-End Exam Duration: 3 Hrs	
<b>Pre-Requisites:</b>								
<b>Course Objectives:</b> CEO1. To introduce the concepts of mathematical logic and the concepts sets, relations, functions. CEO2. To introduce generating functions and recurrence relations and to use Graph Theory for solving problems.								
<b>Course Outcomes: On successful completion of this course, the students will be able to</b> CO1. <b>Apply</b> mathematical logic to solve problems. CO2. <b>Understand</b> the concepts and perform the operations related to sets, relations and functions CO3. <b>Apply</b> basic counting techniques to solve combinatorial problems. CO4. CO5. <b>Formulate</b> problems and solve recurrence relations. CO6. <b>Apply</b> Graph Theory in solving computer science problems.								

### UNIT-I: Mathematical Logic

Introduction,

Statements and Notation, Connectives, Well-formed formulas, Tautology, Duality law, Equivalence, Implication, Normal Forms, Functionally complete set of connectives.

### UNIT-II: Set theory

The Principle of Inclusion- Exclusion (Statements only), Pigeon hole principle and its application, Functions composition of functions, Inverse Functions, Recursive Functions, Lattices and its properties.

### UNIT-III: Elementary Combinatorics

Combinations and Permutations, Enumeration of Combinations and Permutations, Enumerating Combinations and Permutations with Repetitions, Enumerating Permutations with Constrained Repetitions, Binomial Coefficients, The Binomial and Multinomial Theorems.

### UNIT-IV: Recurrence Relations

Generating functions of Sequences, Calculating Coefficients of Generating Functions, Recurrence relations, Solving Recurrence Relations by Substitution and Generating functions, The Method of Characteristic roots, Solutions of Inhomogeneous, Recurrence Relations.

**UNIT-V: Graphs**

Basic Concepts, Isomorphism and Sub graphs, Trees and their Properties, Spanning Trees, Directed Trees, Binary Trees, Planar Graphs, Euler's Formula, Multigraphs and Euler Circuits, Hamiltonian Graphs.

**Total Periods: 45**

**TEXT BOOKS:**

1. J.P. Tremblay and R. Manohar, Discrete Mathematical Structures with Applications to Computer Science, Tata McGraw Hill, 2002.
2. Kenneth H. Rosen, Discrete Mathematics and its Applications with Combinatorics and Graph Theory, 7th Edition, McGraw Hill Education (India) Private Limited.

**REFERENCE BOOKS:**

1. Joe L. Mott, Abraham Kandel and Theodore P. Baker, Discrete Mathematics for Computer Scientists & Mathematicians, 2nd Edition, Pearson Education.
2. Narsingh Deo, Graph Theory with Applications to Engineering and Computer Science.

**UNIVERSAL HUMAN VALUES – UNDERSTANDING HARMONY AND ETHICAL HUMAN CONDUCT**

(Common to AIML, CE, CSE, ECE, EEE, ME)

(Open Elective / Inter Disciplinary Elective / Professional Elective)

Course Code	Category	Hours/Week			Credits	Maximum Marks		
		L	T	P		C	Continuous Internal Assessment	Sem.-End Exam
23HS311	Humanities, Social Science and Management Course (HSMC)							
		2	1	0	3	30	70	100
<b>Mid Exam Duration: 2 Hrs</b>						<b>Sem.-End Exam Duration: 3 Hrs</b>		
<b>Pre-Requisites:</b>								
<b>Course Objectives:</b>								
<p><b>CEO1.</b> To help the students appreciate the essential complementary between 'VALUES' and 'SKILLS' to ensure sustained happiness and prosperity which are the core aspirations of all human beings.</p> <p><b>CEO2.</b> To facilitate the development of a Holistic perspective among students towards life and profession as well as towards happiness and prosperity based on a correct understanding of the Human reality and the rest of existence. Such holistic perspective forms the basis of Universal Human Values and movement towards value-based living in a natural way.</p> <p><b>CEO3.</b> To highlight plausible implications of such a Holistic understanding in terms of ethical human conduct, trustful and mutually fulfilling human behaviour and mutually enriching interaction with Nature.</p>								
<b>Course Outcomes: On successful completion of this course, the students will be able to</b>								
<p><b>CO1. Define</b> the terms like Natural Acceptance, Happiness and Prosperity.</p> <p><b>CO2. Identify</b> one's self, and one's surroundings (family, society nature).</p> <p><b>CO3. Apply</b> what they have learnt to their own self in different day-to-day settings in real Life.</p> <p><b>CO4. Relate</b> human values with human relationship and human society.</p> <p><b>CO5. Justify</b> the need for universal human values and harmonious existence.</p> <p><b>CO6. Develop</b> as socially and ecologically responsible engineers.</p>								

**UNIT-I: INTRODUCTION TO VALUE EDUCATION**

**General Introduction to Values** - Right Understanding, Relationship and Physical Facility (Holistic Development and the Role of Education) - Understanding Value Education - Practice Session PS1 Sharing about Oneself - self-exploration as the Process for Value Education – Continuous Happiness and Prosperity – the Basic Human Aspirations - Practice Session PS2 Exploring Human Consciousness - Happiness and Prosperity – Current Scenario - Method to Fulfill the Basic Human Aspirations - Practice Session PS3 Exploring Natural Acceptance.

**UNIT-II: HARMONY IN THE HUMAN BEING**

**Human Nature Relationships** - Understanding Human being as the Co-existence of the self and the body - Distinguishing between the Needs of the self and the body - Practice Session PS4 Exploring the difference of Needs of self and body - The body as an Instrument of the self - Understanding Harmony in the self - Practice Session PS5 Exploring Sources of Imagination in the self - Harmony of the self with the body - Programme to ensure self-regulation and Health - Practice Session PS6 Exploring Harmony of self with the body.

**UNIT-III: HARMONY IN THE FAMILY AND SOCIETY (9 periods)**

**Harmony in the Family** – the Basic Unit of Human Interaction - 'Trust' – the Foundational Value in Relationship - Practice Session PS7 Exploring the Feeling of Trust - 'Respect' – as the Right Evaluation - Practice Session PS8 Exploring the Feeling of Respect - Other Feelings, Justice in Human-to-Human Relationship - Understanding Harmony in the Society - Vision for the Universal Human Order.

**UNIT-IV: HARMONY IN THE NATURE/EXISTENCE (8 periods)**

**Understanding Harmony in the Nature** - Interconnectedness, self-regulation and Mutual Fulfilment among the Four Orders of Nature - Practice Session PS10 Exploring the Four Orders of Nature - Realizing Existence as Co-existence at All Levels - The Holistic Perception of Harmony in Existence - Practice Session PS11 Exploring Co-existence in Existence.

**UNIT-V: HOLISTIC PERCEPTION OF HARMONY (9 periods)**

**Understanding the Harmony in the society** - Universal Order - Practice Session PS12 Understanding the Harmony in the society - Critical appreciation of Human values - Justice, Trust.

**Total Periods: 45**

**TEXT BOOKS:**

1. R R Gaur, R Asthana, G P Bagaria, A Foundation Course in Human Values and Professional Ethics, 2nd Revised Edition, Excel Books, New Delhi, 2019. ISBN 978-93-87034-47-1 b. The Teacher's Manual.

DIGITAL LOGIC AND COMPUTER ORGANIZATION (Professional Core)								
Course Code	Category	Hours/Week			Credits	Maximum Marks		
2305301	Professional Core	L	T	P	C	Continuous Internal Assessment	Sem.-End Exam	Total
		3	0	0	3	30	70	100
<b>Mid Exam Duration: 1.5 Hrs</b>						<b>Sem.-End Exam Duration: 3 Hrs</b>		
<b>Pre-Requisites:</b>								
<b>Course Objectives:</b>								
<p><b>CEO1.</b> Provide students with a comprehensive understanding of digital logic design principles and computer organization fundamentals</p> <p><b>CEO2.</b> Describe memory hierarchy concepts</p> <p><b>CEO3.</b> Explain input/output (I/O) systems and their interaction with the CPU, memory, and peripheral devices</p>								
<b>Course Outcomes: On successful completion of this course, the students will be able to</b>								
<p><b>CO1.</b> Demonstrate combinational circuits, sequential circuits and functional units of computers. (L2)</p> <p><b>CO2.</b> Analyze the design and operation of processors, including instruction execution, pipelining, and control unit mechanisms, to comprehend their role in computer systems. (L4)</p> <p><b>CO3.</b> Describe memory hierarchy concepts, including cache memory, virtual memory, and secondary storage, and evaluate their impact on system performance and scalability. (L3)</p> <p><b>CO4.</b> Explain input/output (I/O) systems and their interaction with the CPU, memory, and peripheral devices, including interrupts, DMA, and I/O mapping techniques. (L3)</p> <p><b>CO5.</b> Design Sequential and Combinational Circuits. (L6)</p>								

### UNIT-I:

**Data Representation:** Binary Numbers, Fixed Point Representation. Floating Point Representation. Number base conversions, Octal and Hexadecimal Numbers, Signed binary numbers, Binary codes

**Digital Logic Circuits-I:** Basic Logic Functions, Logic gates, universal logic gates, Minimization of Logic expressions. K-Map Simplification, Combinational Circuits, Decoders, Multiplexers

### UNIT-II:

**Digital Logic Circuits-II:** Sequential Circuits, Flip-Flops, Binary counters, Registers, Shift Registers,

**Basic Structure of Computers:** Computer Types, Functional units, Basic operational concepts, Bus structures, Software, Performance, multiprocessors and multi computers, Computer Generations.

### **UNIT-III:**

**Computer Arithmetic:** Addition and Subtraction of Signed Numbers, Multiplication of Positive Numbers, Signed-operand Multiplication, Integer Division, Floating-Point Numbers and Operations

**Processor Organization:** Fundamental Concepts, Execution of a Complete Instruction, Multiple-Bus Organization, Hardwired Control and Multi programmed Control

### **UNIT-IV:**

**The Memory Organization:** Basic Concepts, Semiconductor RAM Memories, Read-Only Memories, Speed, Size and Cost, Cache Memory, Performance Considerations, Virtual Memory, Memory Management Requirements, Secondary Storage

### **UNIT-V:**

**Input /Output Organization:** Accessing I/O Devices, Interrupts, Direct Memory Access, Buses, Interface Circuits, Standard I/O Interfaces

### **TEXT BOOKS:**

1. Computer Organization, Carl Hamacher, Zvonko Vranesic, Safwat Zaky, 6th edition, McGraw Hill, 2023.
2. Digital Design, 6th Edition, M. Morris Mano, Pearson Education, 2018.
3. Computer Organization and Architecture, William Stallings, 11thEdition, Pearson, 2022.

### **REFERENCE BOOKS:**

1. Computer Systems Architecture, M. Moris Mano, 3rdEdition, Pearson, 2017.
2. Computer Organization and Design, David A. Paterson, John L. Hennessy, Elsevier, 2004.
- Fundamentals of Logic Design, Roth, 5thEdition, Thomson, 2003.

ADVANCED DATA STRUCTURES AND ALGORITHM ANALYSIS (Common To CSE, CSE(DS ), AI&ML, CSE(AI&ML)) (Professional Core)								
Course Code	Category	Hours/Week			Credits	Maximum Marks		
2305302	(Professional Core)	L	T	P	C	Continuous Internal Assessment	Sem.-End Exam	Total
		3	0	0	3	30	70	100
Mid Exam Duration: 1.5 Hrs						Sem.-End Exam Duration: 3 Hrs		
Pre-Requisites: Data Structures								
<b>Course Objectives:</b> CEO1. provide knowledge on advance data structures frequently used in Computer Science domain CEO2. Develop skills in algorithm design techniques popularly used CEO3. Understand the use of various data structures in the algorithm design								
<b>Course Outcomes: On successful completion of this course, the students will be able to</b> CO1. Demonstrate the advanced tree data structures, and their applications (L2) CO2. Analyze graph traversals methods, connected and biconnected components (L4) CO3. Apply greedy and dynamic methods to find out feasible and optimal solutions (L3) CO4. Evaluate and verify the possible solutions using backtracking method (L5) CO5. Construct nondeterministic algorithms, branch and bound solutions for complex problems (L6)								

### UNIT-I:

Introduction to Algorithm Analysis, Space and Time Complexity analysis, Asymptotic Notations.  
AVL Trees – Creation, Insertion, Deletion operations and Applications

### UNIT-II:

**Heap Trees (Priority Queues)** – Min and Max Heaps, Operations and Applications  
**Graphs** – Terminology, Representations, Basic Search and Traversals, Connected Components and Biconnected Components, applications.

### UNIT-III:

**Divide and Conquer:** The General Method, Quick Sort, Merge Sort, Strassen’s matrix multiplication.  
**Greedy Method:** General Method, Job Sequencing with deadlines, Knapsack Problem, Minimum cost spanning trees, Single Source Shortest Paths.

**UNIT-IV:**

**Dynamic Programming:** General Method, All pairs shortest paths , 0/1 Knapsack, Travelling Salesperson problem, Optimal Binary Search Tree.

**Backtracking:** General Method, 8-Queens Problem, Sum of Subsets problem, Graph Coloring.

**UNIT-V:**

**Branch and Bound:** The General Method, 0/1 Knapsack Problem, Travelling Salesperson problem

**NP Hard and NP Complete Problems:** Basic Concepts, P, NP, NP Hard and NP complete classes.

**TEXT BOOKS:**

1. Fundamentals of Data Structures, Horowitz, Ellis; Sahni, Sartaj; Mehta, Dinesh 2nd Edition Universities Press
2. Computer Algorithms, Ellis Horowitz, Sartaj Sahni, Sanguthevar Rajasekaran 2nd Edition University Press

**REFERENCE BOOKS:**

1. Data Structures and program design in C, Robert Kruse, Pearson Education Asia
2. Introduction to the Design and Analysis of Algorithms, Levitin, Anany, Pearson Education.
3. An introduction to Data Structures with applications, Trembley & Sorenson, McGraw Hill
4. The Art of Computer Programming, Vol.1: Fundamental Algorithms, Donald E Knuth, Addison-Wesley, 1997.
5. Data Structures using C & C++: Langsam, Augenstein & Tanenbaum, Pearson, 1995
6. Algorithms + Data Structures & Programs:, N. Wirth, PHI
7. Fundamentals of Data Structures in C++: Horowitz Sahni & Mehta, Galgottia Pub.
8. Data structures in Java:, Thomas Standish, Pearson Education Asia
9. Classic Data Structures, Debasis Samanta, PHI.

**Online Learning Resources:**

**OBJECT ORIENTED PROGRAMMING THROUGH JAVA**  
(Common to CSE, CSE(DS ), AI&ML, CSE(AI&ML))  
(Professional Core)

Course Code	Category	Hours/Week			Credits	Maximum Marks		
		L	T	P		C	Continuous Internal Assessment	Sem.-End Exam
2305303	Professional Core	3	0	0	3	30	70	100

**Mid Exam Duration: 1.5 Hrs**

**Sem.-End Exam Duration: 3 Hrs**

**Pre-Requisites:** C programming

**Course Objectives:**

**CEO1.** Identify Java language components and how they work together in applications

**CEO2.** Learn the fundamentals of object-oriented programming in Java, including defining classes, invoking methods, using class libraries.

**CEO3.** Learn how to extend Java classes with inheritance and dynamic binding and how to use exception handling in Java applications

**CEO4.** Understand how to design applications with threads in Java

**CEO5.** Understand how to use Java APIs for program development

**Course Outcomes: On successful completion of this course, the students will be able to**

**CO1.** Analyze problems, design solutions using OOP principles, and implement them efficiently in Java. (L4)

**CO2.** Design and implement classes to model real-world entities, with a focus on attributes, behaviors, and relationships between objects (L3)

**CO3.** Demonstrate an understanding of inheritance hierarchies and polymorphic behavior, including method overriding and dynamic method dispatch. (L3)

**CO4.** Apply Competence in handling exceptions and errors to write robust and fault-tolerant code. (L3)

**CO5.** Perform file input/output operations, including reading from and writing to files using Java I/O classes, graphical user interface (GUI)programming using JavaFX. (L4)

**UNIT-I: Object Oriented Programming**

Basic concepts, Principles, Program Structure in Java: Introduction, Writing Simple Java Programs, Elements or Tokens in Java Programs, Java Statements ,Command Line Arguments, User Input to Programs, Escape Sequences Comments, Programming Style.

**Data Types, Variables, and Operators :** Introduction, Data Types in Java, Declaration of Variables, Data Types, Type Casting, Scope of Variable Identifier ,Literal Constants ,Symbolic Constants ,Formatted Output with printf () Method, Static Variables and Methods, Attribute Final,

**Introduction to Operators,** Precedence and Associativity of Operators, Assignment Operator(=), Basic Arithmetic Operators, Increment (++) and Decrement (- -) Operators, Ternary Operator, RelationalOperators,BooleanLogicalOperators,BitwiseLogicalOperators.

**Control Statements:** Introduction, if Expression, Nested if Expressions, if–else Expressions, Ternary Operator?:, Switch Statement, Iteration Statements, while Expression, do–while Loop,forLoop,NestedforLoop,For–EachforLoop,BreakStatement,ContinueStatement

## **UNIT-II: Arrays**

Introduction, Declaration and Initialization of Arrays, Storage of Array in Computer Memory, Accessing Elements of Arrays, Operations on Array Elements, Assigning Array to Another Array, Dynamic Change of Array Size, Sorting of Arrays, Search for Values in Arrays, Class Arrays, Two-dimensional Arrays, Arrays of Varying Lengths, Three-dimensional Arrays.

### **Classes and Objects**

Introduction, Class Declaration and Modifiers, Class Members, Declaration of Class Objects, Assigning One Object to Another, Access Control for Class Members, Accessing Private Members of Class, Constructor Methods for Class, Overloaded Constructor Methods, Nested Classes, Final Class and Methods, Passing Arguments by Value and by Reference, Keyword this.

**Methods:** Introduction, Defining Methods, Overloaded Methods, Overloaded Constructor Methods, Class Objects as Parameters in Methods, Access Control, Recursive Methods, Overriding Methods, Attributes Final and Static.

## **UNIT-III: Inheritance and Interfaces**

**Inheritance:** Introduction, Process of Inheritance, Types of Inheritances, Universal Super Class-Object Class, Inhibiting Inheritance of Class Using Final, Access Control and Inheritance, Multilevel Inheritance, Application of Keyword Super, Constructor Method and Inheritance, Method Overriding, Abstract Classes, Interfaces and Inheritance.

**Interfaces:** Introduction, Declaration of Interface, Implementation of Interface, Multiple Interfaces, Nested Interfaces, Inheritance of Interfaces.

## **UNIT-IV: Packages and Java Library**

Introduction, Defining Package, Importing Packages and Classes into Programs, Path and Class Path, Access Control, Packages in Java SE, Java.lang Package and its Classes, Class Object, Enumeration, class Math, Wrapper Classes, Java util Classes and Interfaces, Time Package, Formatting for Date/Time in Java.

**Exception Handling:** Introduction, Hierarchy of Standard Exception Classes, Keywords throws and throw, try, catch, and finally Blocks, Multiple Catch Clauses, Class Throwable, Unchecked Exceptions, Checked Exceptions.

**Java I/O and File:** Java I/O API, standard I/O streams, types, Byte streams, Character streams, Scanner class, Files in Java

## **UNIT-V: String Handling in Java**

Introduction, Class String, Methods for Extracting Characters from Strings, Comparison, Modifying, Searching; Class String Buffer.

**Multithreaded Programming:** Introduction, Need for Multiple Threads Multithreaded Programming for Multi-core Processor, Thread Class, Main Thread-Creation of New Threads, Thread States, Thread Priority-Synchronization.

**Java FX GUI:** Java FX Scene Builder, Java FX App Window Structure, displaying text and image, event handling, mouse events

**Text Books:**

1. JAVA one step ahead, Anitha Seth, B.L. Juneja, Oxford.
2. Joy with JAVA, Fundamentals of Object Oriented Programming, Debasis Samanta, Monalisa Sarma, Cambridge,2023.
3. JAVA9forProgrammers, Paul Deitel, Harvey Deitel, 4<sup>th</sup>Edition, Pearson.

**References Books:**

1. The complete Reference Java,11<sup>th</sup>edition, Herbert Schildt, TMH
2. Introduction to Java programming, 7<sup>th</sup>Edition, Y Daniel Liang, Pearson

**ADVANCED DATA STRUCTURES AND ALGORITHMS ANALYSIS LAB**  
 (Common to CSE, CSE(DS ), AI&ML, CSE(AI&ML))  
 (Professional Core)

Course Code	Category	Hours/Week			Credits	Maximum Marks		
		L	T	P		C	Continuous Internal Assessment	Sem.-End Exam
2305351	Professional Core	0	0	3	1.5	30	70	100
<b>Pre-Requisites:</b> Data Structures								
<b>Course Objectives:</b> CEO1. Acquire practical skills in constructing and managing Data structures CEO2. Apply the popular algorithm design methods in problem-solving								
<b>Course Outcomes: On successful completion of this course, the students will be able to</b> CO1. Demonstrate the Non-Linear data structures by developing and implementing the operations on AVL Trees, Heaps and Graphs. (L2) CO2. Implement Divide and Conquer methods for sorting elements (L5) CO3. Utilize appropriate data structures and algorithms to optimize solutions for specific computational problems. (L3) CO4. Design and develop programs to solve real world problems using Backtracking methods. (L5) CO5. Design algorithms to solve real-world problems (L6)								

**Experiments covering the Topics:**

- Operations on AVL trees, B-Trees, Heap Trees
- Graph Traversals
- Sorting techniques
- Minimum cost spanning trees
- Shortest path algorithms
- 0/1 Knapsack Problem
- Travelling Salesperson problem
- Optimal Binary Search Trees
  
- N-Queens Problem
- Job Sequencing

**Minimum Ten experiments are to be conducted.**

**List of Exercises/List of Experiments:**

**Sample Programs:**

1. Construct an AVL tree for a given set of elements which are stored in a file. And implement insert and delete operation on the constructed tree.
2. Construct Min and Max Heap using arrays, delete any element and display the content of the Heap.
3. Implement Breadth First Traversal and Depth First Traversal for a given graph.
4. Implement Quick sort and Merge sort and observe the execution time for various input sizes (Average, Worst and Best cases).
5. Implement the Single Source Shortest Paths using Greedy method when the graph is represented by adjacency matrix.
6. Implement Job sequencing with deadlines using Greedy strategy.
7. Implement a all pair shortest path for a given path.
8. Write a program to solve 0/1 Knapsack problem Using Dynamic Programming.
9. Implement Travelling Sales Person problem using Dynamic Programming.
10. Implement N-Queens Problem Using Backtracking.

**REFERENCE BOOKS/LABORATORY MANUALS:**

3. Fundamentals of Data Structures in C++, Horowitz Ellis, Sahni Sartaj, Mehta, Dinesh, 2ndEdition, Universities Press
4. Computer Algorithms/C++ Ellis Horowitz, SartajSahni, Sanguthevar Rajasekaran, 2ndEdition, University Press
5. Data Structures and program design in C, Robert Kruse, Pearson Education Asia
6. An introduction to Data Structures with applications, Trembley& Sorenson, McGraw Hill

**ADDITIONAL LEARNING RESOURCES:**

1. <http://cse01-iiith.vlabs.ac.in/>
2. <http://peterindia.net/Algorithms.html>

<b>OBJECT ORIENTED PROGRAMMING THROUGH JAVA LAB</b> (Common to CSE, CSE(DS ), AI&ML, CSE(AI&ML)) (Professional Core)								
Course Code	Category	Hours/Week			Credits	Maximum Marks		
2305352	Professional Core	L	T	P	C	Continuous Internal Assessment	Sem.-End Exam	Total
		0	0	3	1.5	30	70	100
<b>Pre-Requisites:</b> C programming								
<b>Course Objectives:</b> <b>CEO1.</b> Practice object-oriented programming in the Java programming language <b>CEO2.</b> Implement Classes, Objects, Methods, Inheritance, Exception, Runtime Polymorphism, User defined Exception handling mechanism <b>CEO3.</b> Illustrate inheritance, Exception handling mechanism <b>CEO4.</b> Construct Threads, Event Handling, implement packages, Java FXGUI								
<b>Course Outcomes: On successful completion of this course, the students will be able to</b> <b>CO1.</b> Demonstrate a solid understanding of Java syntax, including data types, control structures, methods, classes, objects, inheritance, polymorphism, and exception handling. (L2) <b>CO2.</b> Apply fundamental OOP principles such as encapsulation, inheritance, polymorphism, and abstraction to solve programming problems effectively. (L3) <b>CO3.</b> Familiar with commonly used Java libraries and APIs, including the Collections Framework, Java I/O and other utility classes. (L2) <b>CO4.</b> Develop problem-solving skills and algorithmic thinking, applying OOP concepts to design efficient solutions to various programming challenges. (L3) <b>CO5.</b> Proficiently construct graphical user interface (GUI) applications using JavaFX (L4)								

**Sample Experiments:**

**Exercise-1:**

- a) Write a JAVA program to display default value of all primitive data types of JAVA
- b) Write a java program that displaytherootsofaquadraticcequation $ax^2+bx=0$ . Calculate the discriminate D and basing on value of D, describe the nature of root.

**Exercise-2**

- a) Write a JAVA program to search for an element in a given list of elements using binary search mechanism.
- b) Write a JAVA program to sort for an element in a given list of elements using bubble sort

c) Write a JAVA program using StringBuffer to delete ,remove character.

#### **Exercise-3**

- a) Write a JAVA program to implement class mechanism. Create a class, methods and invoke them inside main method.
- b) Write a JAVA program implement method overloading.
- c) Write a JAVA program to implement constructor.
- d) Write a JAVA program to implement constructor overloading.

#### **Exercise-4**

- a) Write a JAVA program to implement Single Inheritance
- b) Write a JAVA program to implement multilevel Inheritance
- c) Write a JAVA program for abstract class to find areas of different shapes

#### **Exercise-5**

- a) Write a JAVA program give example for“super” keyword.
- b) Write a JAVA program to implement Interface. What kind of Inheritance can be achieved?
- c) Write a JAVA program that implements Runtime polymorphism

#### **Exercise-6**

- a) Write a JAVA program that describes exception handling mechanism
- b) Write a JAVA program Illustrating Multiple catch clauses
- c) Write a JAVA program for creation of Java Built-in Exceptions
- d) Write a JAVA program for creation of User Defined Exception

#### **Exercise-7**

a) Write a JAVA program that creates threads by extending Thread class. First thread display “Good Morning “every 1 sec, the second thread displays “Hello “every 2 seconds and the third display “Welcome” every 3 seconds, (Repeat the same by implementing Runnable)

#### **Exercise-8**

- a) Write a JAVA program that import and use the user defined packages
- b) Without writing any code, build a GUI that display text in label and image in an Image View (use JavaFX)
- c) Build a Tip Calculator app using several JavaFX components and learn how to respond to user interactions with the GUI

#### **Textbooks:**

1. JAVA one step ahead, Anitha Seth, B.L. Juneja, Oxford.
2. Joy with JAVA, Fundamentals of Object Oriented Programming, Debasis Samanta, Monalisa Sarma, Cambridge, 2023.
3. JAVA9 for Programmers, Paul Deitel, Harvey Deitel, 4<sup>th</sup>Edition, Pearson.

#### **References Books:**

1. ThecompleteReferenceJava,11<sup>th</sup>edition, Herbert Schildt, TMH
2. IntroductiontoJavaprogramming,7<sup>th</sup>Edition, Y Daniel Liang, Pearson

**S/W and Tools Used:**

- a) JavaSE (JDK)
- b) MYSQL
- c) Editor

<b>PYTHON PROGRAMMING</b> (Common to CSE, CSE(DS ), AI&ML, CSE(AI&ML), ECE, EEE, ME) (Skill Enhancement Course)								
Course Code	Category	Hours/Week			Credits	Maximum Marks		
2305353	Skill Enhancement Course	L	T	P	C	Continuous Internal Assessment	Sem.-End Exam	Total
		0	1	2	2	30	70	100
<b>Pre-Requisites:</b> Programming in C Language.								
<b>Course Objectives:</b> <b>CEO1.</b> Introduce core programming concepts of Python programming language. <b>CEO2.</b> Introduce core programming concepts of Python programming language. <b>CEO3.</b> Demonstrate about Python data structures like Lists, Tuples, Sets and dictionaries. <b>CEO4.</b> Implement Functions, Modules and Regular Expressions in Python Programming and to create practical and contemporary applications using these								
<b>Course Outcomes: On successful completion of this course, the students will be able to</b> <b>CO1.</b> Classify data structures of Python (L4) <b>CO2.</b> Apply Python programming concepts to solve a variety of computational problems (L3) <b>CO3.</b> Understand the principles of object-oriented programming (OOP) in Python, including classes, objects, inheritance, polymorphism, and encapsulation, and apply them to design and implement Python programs (L3) <b>CO4.</b> Become proficient in using commonly used Python libraries and frameworks such as JSON, XML, NumPy, pandas (L2) <b>CO5.</b> Exhibit competence in implementing and manipulating fundamental data structures such as lists, tuples, sets, dictionaries (L3)								

### List of Exercises/List of Experiments:

Minimum Ten experiments are to be conducted.

1. Write a program to find the largest element among three Numbers.
2. Write a Program to display all prime numbers within an interval
3. Write a program to swap two numbers without using a temporary variable.
4. Demonstrate the following Operators in Python with suitable examples.
  - i) Arithmetic Operators ii) Relational Operators iii) Assignment Operators
  - iv) Logical Operators v) Bit wise Operators vi) Ternary Operator
  - vii) Membership Operators viii) Identity Operators
5. Write a program to add and multiply complex numbers
6. Write a program to print multiplication table of a given number
7. Write a program to define a function with multiple return values.
8. Write a program to define a function using default arguments.

9. Write a program to find the length of the string without using any library functions.
10. Write a program to check if the substring is present in a given string or not.
11. Write a program to perform the given operations on a list:
  - i) Addition
  - ii. Insertion
  - iii. Slicing
12. Write a program to perform any 5 built-in-functions by taking any list
13. Write a program to create tuples (name, age, address, college) for at least two members and concatenate the tuples and print the concatenated tuples.
14. Write a program to count the number of vowels in a string (No control flow allowed).
15. Write a program to check if a given key exists in a dictionary or not.
16. Write a program to add a new key-value pair to an existing dictionary.
17. Write a program to sum all the items in a given dictionary.
18. Write a program to sort words in a file and put them in another file. The output file should have only lower-case words, so any upper-case words from source must be lowered.
19. Python program to print each line of a file in reverse order.
20. Python program to compute the number of characters, words and lines in a file.
21. Write a program to create, display, append, insert and reverse the order of the items in the array.
22. Write a program to add, transpose and multiply two matrices.
23. Write a Python program to create a class that represents a shape. Include methods to calculate its area and perimeter. Implement subclasses for different shapes like circle, triangle, and square.
24. Python program to check whether a JSON string contains complex object or not.
25. Python Program to demonstrate NumPy arrays creation using array () function.
26. Python program to demonstrate basic slicing, integer and Boolean indexing.
27. Python program to find min, max, sum, cumulative sum of array
28. Create a dictionary with at least five keys and each key represent value as a list where this list contains at least ten values and convert this dictionary as a pandas data frame and explore the data through the data frame as follows:
  - a) Apply head () function to the pandas data frame
  - b) Perform various data selection operations on Data Frame
29. Select any two columns from the above data frame, and observe the change in one attribute with respect to other attribute with scatter and plot operations in matplotlib

### **Text Books:**

1. Gowrishankar S, Veena A., Introduction to Python Programming, CRC Press.
2. Python Programming, S Sridhar, J Indumathi, V M Hariharan, 2<sup>nd</sup> Edition, Pearson, 2024
3. Introduction to Programming Using Python, Y. Daniel Liang, Pearson.

### **SOFTWARE/Tools used:**

- . Anaconda
- . Jupyter Notebook.

### **ADDITIONAL LEARNING RESOURCES:**

Online Learning Resources/Virtual Labs:

- <https://www.coursera.org/learn/python?specialization=python#syllabus>

ENVIRONMENTAL SCIENCE								
(Common to AIML, CE, CSE, ECE, EEE, ME)								
(Open Elective / Inter Disciplinary Elective / Professional Elective)								
Course Code	Category	Hours/Week			Credits	Maximum Marks		
23HS331	Basic Sciences (BS)	L	T	P	C	Continuous Internal Assessment	Sem.-End Exam	Total
		2	0	0	0	0	30	00
Mid Exam Duration: 2 Hrs						Sem.-End Exam Duration: 0 Hrs		
Pre-Requisites:								
<b>Course Objectives:</b> <b>CEO1.</b> To make the students to get awareness on environment. <b>CEO2.</b> To stress the importance of protecting natural resources, ecosystems for future generations and pollution cause due to the day-to -ay activities of human life. <b>CEO3.</b> To save earth from the inventions by the engineers.								
<b>Course Outcomes: On successful completion of this course, the students will be able to</b> <b>CO1. Influence</b> the society in proper utilization of Natural resources. <b>CO2. Quantify</b> the interconnection of human dependence on this ecosystem. <b>CO3. Recall</b> the concepts of biodiversity & gain knowledge on distribution at different levels. <b>CO4. Analyze</b> the impact of environmental pollution on environment & solving environmental problems <b>CO5. Discuss</b> environmental laws & analyze the environmental concerns and follow sustainable developmental activities.								

### UNIT-I:

**Multidisciplinary Nature of Environmental Studies:** – Definition, Scope and Importance – Need for Public Awareness.

**Natural Resources:** Renewable and non-renewable resources – Natural resources and associated problems – Forest resources – Use and over – exploitation, deforestation, case studies – Timber extraction – Mining, dams and other effects on forest and tribal people – Water resources – Use and over utilization of surface and ground water – Floods, drought, conflicts over water, dams – benefits and problems – Mineral resources: Use and exploitation, environmental effects of extracting and using mineral resources, case studies – Food resources: World food problems, changes caused by agriculture and overgrazing, effects of modern agriculture, fertilizer-pesticide problems, waterlogging, salinity, case studies. – Energy resources:

### UNIT-II:

**Ecosystems:** Concept of an ecosystem. – Structure and function of an ecosystem – Producers, consumers and decomposers – Energy flow in the ecosystem – Ecological succession – Food chains, food webs and ecological pyramids – Introduction, types, characteristic features, structure and function of the following ecosystem:

- a. Forest ecosystem.
- b. Grassland ecosystem
- c. Desert ecosystem.
- d. Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries).

### **UNIT-III:**

**Biodiversity and its Conservation :** Introduction 0 Definition: genetic, species and ecosystem diversity – Bio-geographical classification of India – Value of biodiversity: consumptive use, Productive use, social, ethical, aesthetic and option values – Biodiversity at global, National and local levels – India as a mega-diversity nation – Hot-spots of biodiversity – Threats to biodiversity: habitat loss, poaching of wildlife, man-wildlife conflicts – Endangered and endemic species of India – Conservation of biodiversity: In-situ and Ex-situ conservation of biodiversity.

### **UNIT-IV:**

**Environmental Pollution:** Definition, Cause, effects and control measures of :

- a. Air Pollution.
- b. Water pollution
- c. Soil pollution
- d. Marine pollution
- e. Noise pollution
- f. Thermal pollution
- g. Nuclear hazards

**Solid Waste Management:** Causes, effects and control measures of urban and industrial wastes – Role of an individual in prevention of pollution – Pollution case studies – Disaster management: floods, earthquake, cyclone and landslides.

### **UNIT-V:**

**Social Issues and the Environment:** From Unsustainable to Sustainable development. Issues and possible solutions – Climate change, global warming, acid rain, ozone layer depletion, nuclear accidents. Environment Protection Act. – Air (Prevention and Control of Pollution) Act. -Water (Prevention and control of Pollution) Act – Wildlife Protection Act – Forest Conservation Act.

**Human Population and the Environment:** Population growth, variation among nations. Population explosion – Family Welfare Programmes. – Environment and human health – Human Rights – Value Education – HIV/AIDS – Women and Child Welfare – Role of information Technology in Environment and human health – Case studies.

**Field Work:** Visit to a local area to document environmental assets River/forest grassland/ hill/

mountain – Visit to a local polluted site-Urban/Rural/Industrial/Agricultural Study of common plants, insects, and birds – river, hill slopes, etc.

**TEXT BOOKS:**

1. Text book of Environmental Studies for Undergraduate Courses by Erach Bharucha for University Grants Commission, Universities Press.
2. Environmental studies by Benny Joseph, Mc, Graw Hill Publications.
3. Principles and a basic course of Environmental science for under graduate course by Kousic, KouShic.
4. Text book of Environmental science and Technology by M. Anji Reddy, BS Publication.

**REFERENCE BOOKS:**

1. Environmental sciences and engineering – J. Glynn Henry and Gary W. Heinke – Printice hall of India Private limited.
2. Environmental Studies by Anindita Basak – Pearson education.
3. Introduction to Environmental engineering and science by Gilbert M. Masters and Wendell P. Ela - Printice hall of India Private limited.
4. Environmental Science, A Global Concerns, William P. Cunningham, Mary Ann Cunningham, Mc Graw Hill publications.

## **IV Semester**

**MANAGERIAL ECONOMICS AND FINANCIAL ANALYSIS**

Course Code	Category	Hours/Week			Credits	Maximum Marks		
		L	T	P		C	Continuous Internal Assessment	Sem.-End Exam
23HS421	Humanities (Management)	2	0	0	2	30	70	100
		<b>Mid Exam Duration: 2 Hrs</b>					<b>Sem.-End Exam Duration: 3 Hrs</b>	
<b>Pre-Requisites:</b>								
Title of the Pre-requisite Course(s)								
<b>Course Objectives:</b>								
<p><b>CEO1.</b> To inculcate the basic knowledge of microeconomics and financial accounting</p> <p><b>CEO2.</b> To make the students learn how demand is estimated for different products, input-output relationship for optimizing production and cost minimization.</p> <p><b>CEO3.</b> To Know the Various types of market structure and pricing methods and strategy</p> <p><b>CEO4.</b> To give an overview on investment appraisal methods to promote the students to learn how to plan long-term investment decisions.</p> <p><b>CEO5.</b> To provide fundamental knowledge on accounting and to explain the process of preparing financial statements</p>								
<b>Course Outcomes: On successful completion of this course, the students will be able to</b>								
<p><b>CO1.</b> Define the concepts related to Managerial Economics, financial accounting and management(L2)</p> <p><b>CO2.</b> Understand the fundamentals of Economics viz., Demand, Production, cost, revenue and markets (L2)</p> <p><b>CO3.</b> Apply the Concept of Production cost and revenues for effective Business decision (L3)</p> <p><b>CO4.</b> Analyzing and evaluating investment decisions using Capital budgeting techniques to maximize the returns. (L5)</p> <p><b>CO5.</b> Able to prepare financial statements and evaluate the financial performance of business firms (L5)</p>								

**UNIT-I: Managerial Economics**

Introduction –Meaning, Nature and scope, significance. Demand-Concept, Function, Law of Demand - Demand Elasticity- Types – Measurement. Demand Forecasting- Methods. Managerial Economics and Financial Accounting and Management.

**UNIT - II Production and Cost Analysis**

Introduction – Nature, meaning, significance. Production Function with one variable and two variables– Least- cost combination– - Isoquants and Iso costs, Break-Even Analysis - Cost concepts - Determination of Break-Even Point (Simple Problems).

**UNIT - III Capital Budgeting**

Capital Budgeting - Nature, meaning, significance, Features, Proposals, Methods and

Evaluation of Projects – Pay Back period (PBP) Accounting Rate of Return (ARR), Net Present Value (NPV), Internal Rate of Return (IRR) Method and Profitability Index (P/I) (simple problems)

#### **UNIT - IV Business Organizations and Markets**

Introduction – Forms of Business Organizations- Sole Proprietary - Partnership - Joint Stock Companies - Public Sector Enterprises. Types of Markets - Perfect and Imperfect Competition - Features of Perfect Competition Monopoly- Monopolistic Competition– Oligopoly-Price-Output Determination.

#### **UNIT - V Financial Accounting and Analysis (9 periods)**

Introduction – Meaning, Concepts and Conventions- Double-Entry Bookkeeping, Journal, Ledger, Trial Balance- Final Accounts (Trading Account, Profit and Loss Account and Balance Sheet with simple adjustments). Financial Ratios – Types of Ratios.

**Total Periods: 38**

#### **Textbooks:**

1. Varshney & Maheswari: Managerial Economics, Sultan Chand.
2. Aryasri: Business Economics and Financial Analysis, 4/e, MGH.

#### **Reference Books:**

1. Ahuja HI Managerial economics, S. Chand.
2. S.A. Siddiqui and A.S. Siddiqui: Managerial Economics and Financial Analysis, New Age International.
3. Joseph G. Nellis and David Parker: Principles of Business Economics, Pearson, 2/e, New Delhi.
4. Domnick Salvatore: Managerial Economics in a Global Economy, Cengage.

**Online Learning Resources:** <https://www.slideshare.net/123ps/managerial-economics-ppt> <https://www.slideshare.net/rossanz/production-and-cost-45827016> <https://www.slideshare.net/darkyla/business-organizations-19917607> <https://www.slideshare.net/balarajbl/market-and-classification-of-market>

<b>PROBABILITY AND STATISTICS</b>								
(Common to CSE&AIML)								
(Open Elective / Inter Disciplinary Elective / Professional Elective)								
<b>Course Code</b>	<b>Category</b>	<b>Hours/Week</b>			<b>Credits</b>	<b>Maximum Marks</b>		
<b>23HS402</b>	<b>Basic Sciences (BS)</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>	<b>Continuous Internal Assessment</b>	<b>Sem.-End Exam</b>	<b>Total</b>
		3	0	--		3	30	
<b>Mid Exam Duration: 2 Hrs</b>						<b>Sem.-End Exam Duration: 3 Hrs</b>		
<b>Pre-Requisites:</b>								
<b>Course Objectives:</b>								
<p><b>CEO1.</b> To help the students in getting a thorough understanding of statistical elementary tools and the fundamentals of Probability.</p> <p><b>CEO2.</b> To help the students in getting a thorough understanding and usage of statistical techniques like testing of hypothesis.</p>								
<b>Course Outcomes: On successful completion of this course, the students will be able to</b>								
<p><b>CO1. Acquire</b> knowledge in finding the analysis of the data quantitatively or categorically and various statistical elementary tools.</p> <p><b>CO2. Develop</b> skills in designing mathematical models involving probability, random variables and the critical thinking in the theory of probability and its applications in real life problems.</p> <p><b>CO3. Apply</b> the theoretical probability distributions like binomial, Poisson, and Normal in the relevant application areas.</p> <p><b>CO4. Analyze</b> to test various hypotheses included in theory and types of errors for large samples.</p> <p><b>CO5. Apply</b> the different testing tools like t-test, F-test, chi-square test to analyze the relevant real-life problems.</p>								

### **UNIT-I: Descriptive statistics**

Statistics: Introduction, Population vs Sample, Collection of data, primary and secondary data, Measures of Central tendency, Measures of Variability (spread or variance) Skewness, Kurtosis, correlation, correlation coefficient, rank correlation.

### **UNIT-II: Probability**

Probability, probability axioms, addition law and multiplicative law of probability, conditional probability, Baye's theorem, random variables (discrete and continuous), probability density functions, properties, mathematical expectation.

### **UNIT-III: Probability distributions**

Probability distributions: Binomial, Poisson and Normal-their properties (Chebyshev's inequality). Approximation of the binomial distribution to normal distribution.

#### **UNIT-IV: Testing of hypothesis, large sample tests**

Formulation of null hypothesis, alternative hypothesis, the critical and acceptance regions, level of significance, two types of errors and power of the test. Large Sample Tests: Test for single proportion, difference of proportions, test for single mean and difference of means. Confidence interval for parameters in one sample and two sample problems

#### **UNIT-V: Small sample tests**

Student's t-distribution (test for single mean, two means and paired t-test), testing of equality of variances (F-test),  $\chi^2$  - test for goodness of fit,  $\chi^2$  - test for independence of attributes.

#### **TEXT BOOKS:**

1. Miller and Freund, Probability and Statistics for Engineers, 7/e, Pearson, 2008.
2. S.C. Gupta and V.K. Kapoor, Fundamentals of Mathematical Statistics, 11/e, Sultan Chand & Sons Publications, 2012.

#### **REFERENCE BOOKS:**

1. S. Ross, a First Course in Probability, Pearson Education India, 2002.
2. W. Feller, an Introduction to Probability Theory and its Applications, 1/e, Wiley, 1968.
3. B. V. Ramana, Higher Engineering Mathematics, Mc Graw Hill Education.
4. B. S. Grewal, Higher Engineering Mathematics, Khanna Publishers, 2017, 44th Edition.

OPERATING SYSTEMS (Professional Core)								
Course Code	Category	Hours/Week			Credits	Maximum Marks		
2305401	Engineering Science (ESC)	L	T	P	C	Continuous Internal Assessment	Sem.-End Exam	Total
		3	0	0	3	30	70	100
Mid Exam Duration: 1.5 Hrs						Sem.-End Exam Duration: 3 Hrs		
Pre-Requisites: Nil								
<b>Course Objectives:</b> <b>CEO1.</b> Understand the basic concepts and principles of operating systems, including process management, memory management, file systems, and Protection <b>CEO2.</b> Make use of process scheduling algorithms and synchronization techniques to achieve better performance of a computer system. <b>CEO3.</b> Illustrate different conditions for deadlock and their possible solutions.								
<b>Course Outcomes: On successful completion of this course, the students will be able to</b>								
CO1	Understand the basic concepts related to the operating systems.							
CO2	Analyze the various process scheduling algorithms and Understand the Thread concepts							
CO3	Analyze Process synchronization mechanisms & Understand the way to deal the deadlocks							
CO4	Analyze the various memory management schemes							
CO5	Understand the basic concepts related to files in the system & Analyze the protection and security mechanisms.							

### UNIT-I:

**Operating Systems Overview:** Introduction, operating system functions, operating systems operations, Computing environments. **System Structures:** Operating System Services, User and Operating-System Interface, system calls, Types of System Calls, system programs, operating system structure.

### UNIT-II:

**Processes:** Process Concept, Process scheduling, Operations on processes, Inter-process communication. **Threads and Concurrency:** Multithreading models, Thread libraries, Threading issues. **CPU Scheduling:** Basic concepts, Scheduling criteria, Scheduling algorithms, Multiple processor scheduling.

### UNIT-III:

**Synchronization Tools:** The Critical Section Problem, Peterson's Solution, Mutex Locks, Semaphores, Monitors, Classic problems of Synchronization. **Deadlocks:** system Model, Deadlock characterization, Methods for handling Deadlocks, Deadlock prevention, Deadlock avoidance, Deadlock detection, Recovery from Deadlock.

#### UNIT-IV:

**Memory-Management Strategies:** Introduction, Contiguous memory allocation, Paging, Structure of the Page Table, Swapping. **Virtual Memory Management:** Introduction, Demand paging, Page replacement, Allocation of frames,

#### UNIT-V:

**File System:** File System Interface: File concept, Access methods, Directory Structure; File system Implementation: File-system structure, File-system Operations, Allocation method. **Protection:** Goals of protection, Principles of protection, Protection Rings, Domain of protection, Access matrix. **Security:** The security problem, Program threats, User authentication.

#### TEXT BOOKS:

1. Operating System Concepts, Silberschatz A, Galvin P B, Gagne G, 10<sup>th</sup> Edition, Wiley, 2018.
2. Modern Operating Systems, Tanenbaum A S, 4<sup>th</sup> Edition, Pearson , 2016

#### REFERENCE BOOKS:

1. Operating Systems -Internals and Design Principles, Stallings W, 9<sup>th</sup> edition, Pearson, 2018
2. Operating Systems: A Concept Based Approach, D.M Dhamdhare, 3<sup>rd</sup> Edition, McGraw- Hill, 2013

#### ADDITIONAL LEARNING RESOURCES:

2. <http://peterindia.net/OperatingSystems.html>

<b>DATABASE MANAGEMENT SYSTEMS</b> (Common to CSE, CSE(DS ), AI&ML, CSE(AI&ML)) (Professional Core)								
Course Code	Category	Hours/Week			Credits	Maximum Marks		
2339402	Professional Core	L	T	P	C	Continuous Internal Assessment	Sem.-End Exam	Total
		3	0	0	3	30	70	100
<b>Mid Exam Duration: 1.5 Hrs</b>						<b>Sem.-End Exam Duration: 3 Hrs</b>		
<b>Pre-Requisites:</b>								
Data structures, File organization and management								
<b>Course Objectives:</b>								
<p><b>CEO1.</b> Introduce database management systems and to give a good formal foundation on the relational model of data and usage of Relational Algebra</p> <p><b>CEO2.</b> Introduce the concepts of basic SQL as a universal Database language</p> <p><b>CEO3.</b> Demonstrate the principles behind systematic database design approaches by covering conceptual design, logical design through normalization</p> <p><b>CEO4.</b> Provide an overview of physical design of a database system, by discussing Database indexing techniques and storage techniques</p>								
<b>Course Outcomes: On successful completion of this course, the students will be able to</b>								
<p><b>CO1.</b> Understand the basic concepts of database management systems</p> <p><b>CO2.</b> Analyze a given database application scenario to use ER model for conceptual design of the database</p> <p><b>CO3.</b> Utilize SQL proficiently to address diverse query challenges</p> <p><b>CO4.</b> Employ normalization methods to enhance database structure</p> <p><b>CO5.</b> Assess and implement transaction processing, concurrency control and database recovery protocols in databases</p>								

### UNIT-I:

**Introduction:** Database system, Characteristics (Database Vs File System), Database Users, Advantages of Database systems, Database applications. Brief introduction of different Data Models; Concepts of Schema, Instance and data independence; Three tier schema architecture for data independence; Database system structure, environment, Centralized and Client Server architecture for the database.

**Entity Relationship Model:** Introduction, Representation of entities, attributes, entity set, relationship, relationship set, constraints, sub classes, super class, inheritance, specialization, generalization using ER Diagrams.

### UNIT-II:

**Relational Model:** Introduction to relational model, concepts of domain, attribute, tuple, relation, importance of null values, constraints (Domain, Key constraints, integrity constraints) and their importance, Relational Algebra, Relational Calculus. BASIC SQL: Simple Database schema, data types, table definitions (create, alter), different DML operations (insert, delete,

update).

### **UNIT-III: TITLE OF THE UNIT**

**SQL:** Basic SQL querying (select and project) using where clause, arithmetic & logical operations, SQL functions (Date and Time, Numeric, String conversion). Creating tables with relationship, implementation of key and integrity constraints, nested queries, sub queries, grouping, aggregation, ordering, implementation of different types of joins, view(uptable and non-uptable), relational set operations.

### **UNIT-IV: TITLE OF THE UNIT**

**Schema Refinement (Normalization):** Purpose of Normalization or schema refinement, concept of functional dependency, normal forms based on functional dependency Lossless join and dependency preserving decomposition, (1NF, 2NF and 3 NF), concept of surrogate key, Boyce-Codd normal form(BCNF), MVD, Fourth normal form(4NF), Fifth Normal Form (5NF).

### **UNIT-V: TITLE OF THE UNIT**

**Transaction Concept:** Transaction State, ACID properties, Concurrent Executions, Serializability, Recoverability, Implementation of Isolation, Testing for Serializability, lock based, time stamp based, optimistic, concurrency protocols, Deadlocks, Failure Classification, Storage, Recovery and Atomicity, Recovery algorithm.

**Introduction to Indexing Techniques:** B+ Trees, operations on B+Trees, Hash Based Indexing:

#### **Textbooks:**

1. Database Management Systems, 3<sup>rd</sup> edition, Raghurama Krishnan, Johannes Gehrke, TMH (For Chapters 2, 3, 4)
2. Database System Concepts, 5<sup>th</sup> edition, Silberschatz, Korth, Sudarsan, TMH (For Chapter 1 and Chapter 5)

#### **Reference Books:**

1. Introduction to Database Systems, 8<sup>th</sup> edition, C J Date, Pearson.
2. Database Management System, 6<sup>th</sup> edition, Ramez Elmasri, Shamkant B. Navathe, Pearson
3. Database Principles Fundamentals of Design Implementation and Management, Corlos Coronel, Steven Morris, Peter Robb, Cengage Learning.

#### **Web-Resources:**

SOFTWARE ENGINEERING (Professional Core)								
Course Code	Category	Hours/Week			Credits	Maximum Marks		
2305402	Engineering Science (ESC)	L	T	P	C	Continuous Internal Assessment	Sem.-End Exam	Total
		3	0	0	3	30	70	100
<b>Mid Exam Duration: 1.5 Hrs</b>						<b>Sem.-End Exam Duration:3Hrs</b>		
<b>Pre-Requisites:</b> Introduction to Programming								
<b>Course Objectives:</b> <b>CEO1.</b> Software life cycle models, Software requirements and SRS document <b>CEO2.</b> Project Planning, quality control and ensuring good quality software <b>CEO3.</b> Software Testing strategies, use of CASE tools, Implementation issues, validation & verification procedures								
<b>Course Outcomes: On successful completion of this course, the students will be able to</b> <b>CO1.</b> Perform various life cycle activities like Analysis, Design, Implementation, Testing and Maintenance (L3) <b>CO2.</b> Analyse various software engineering models and apply methods for design and development of software projects. (L4) <b>CO3.</b> Develop system designs using appropriate techniques. (L3) <b>CO4.</b> Understand various testing techniques for a software project. (L2) <b>CO5.</b> Apply standards, CASE tools and techniques for engineering software projects (L3)								

### UNIT-I: INTRODUCTION

**Introduction:** Evolution, Software development projects, Computer system engineering.  
Software Life Cycle Models: Basic concepts, Waterfall model and its extensions, Rapid application development, Agile development model, Spiral model.

### UNIT-II: SOFTWARE PROJECT MANAGEMENT

**Software Project Management:** Software project management complexities, Responsibilities of a software project manager, Metrics for project size estimation, Project estimation techniques, Empirical Estimation techniques, COCOMO, Halstead's software science, risk management.  
**Requirements Analysis And Specification:** Requirements gathering and analysis, Software Requirements Specification (SRS).

### UNIT-III: SOFTWARE DESIGN

Software Design: Overview of the design process, How to characterize a good software design? Layered arrangement of modules, Cohesion and Coupling. approaches to software design.  
Agility: Agility and the Cost of Change, Agile Process, Extreme Programming (XP)  
User Interface Design: Characteristics of a good user interface, Basic concepts, Types of user interfaces.

#### **UNIT-IV: CODING AND TESTING**

Coding And Testing: Coding, Code review, Software documentation, Testing, Black-box testing, White-Box testing, Debugging, Integration testing, Smoke testing, and Some general issues associated with testing.

Software Reliability And Quality Management: Software reliability. Statistical testing, Software quality, Software quality management system, SEI Capability maturity model.

#### **UNIT-V: COMPUTER AIDED SOFTWARE DESIGN**

**Computer-Aided Software Engineering (Case):** CASE and its scope, CASE environment, CASE support in the software life cycle, other characteristics of CASE tools, Towards second generation CASE Tool, and Architecture of a CASE Environment.

**Software Maintenance:** Characteristics of software maintenance, Software reverse engineering, Software maintenance process models.

**Software Reuse:** reuse- definition, introduction, reason behind no reuse so far, Basic issues in any reuse program.

#### **TEXT BOOKS:**

1. Fundamentals of Software Engineering, Rajib Mall, 5<sup>th</sup> Edition, PHI.
2. Software Engineering A practitioner's Approach, Roger S. Pressman, 9<sup>th</sup> Edition, Mc- Graw Hill International Edition.

#### **Reference Books:**

1. Software Engineering, Ian Sommerville, 10<sup>th</sup> Edition, Pearson.
2. Software Engineering, Principles and Practices, Deepak Jain, Oxford University Press.

#### **ADDITIONAL LEARNING RESOURCES:**

OPERATING SYSTEMS LAB (Professional Core)								
Course Code	Category	Hours/Week			Credits	Maximum Marks		
2305451	Engineering	L	T	P	C	Continuous Internal Assessment	Sem.-End Exam	Total
		0	0	3	1.5	30	70	100
<b>Pre-Requisites: Nil</b>								
<b>Course Objectives:</b>								
<p><b>CEO3.</b> Provide insights into system calls, file systems, semaphores,  <b>CEO1.</b> Develop and debug CPU Scheduling algorithms, page replacement algorithms.  <b>CEO2.</b> Implement Bankers Algorithms to Avoid the Dead Lock</p>								
<b>Course Outcomes: On successful completion of this course, the students will be able to</b>								
<p><b>CO1.</b> Trace different CPU Scheduling algorithms (L2).  <b>CO2.</b> Implement Bankers Algorithms to Avoid the Dead Lock (L3).  <b>CO3.</b> Evaluate Page replacement algorithms (L5).  <b>CO4.</b> Illustrate the file organization techniques (L4).  <b>CO5.</b> Illustrate Inter process Communication (L4)</p>								

**List of Exercises/List of Experiments:**

1. Practicing of Basic UNIX Commands.
2. Simulate UNIX commands like cp, ls, grep, etc.,
3. Simulate the following CPU scheduling algorithms  
a) FCFS b) SJF c) Priority d) Round Robin
4. Write a program to illustrate concurrent execution of threads using pthreads library.
5. Write a program to solve producer-consumer problem using Semaphores.
6. Implement the following memory allocation methods for fixed partition  
a) First fit b) Worst fit c) Best fit
7. Simulate the following page replacement algorithms  
a) FIFO b) LRU c) LFU
8. Simulate Paging Technique of memory management.
9. Implement Bankers Algorithm for Dead Lock avoidance and prevention
10. Simulate the following file allocation strategies  
a) Sequential b) Indexed c) Linked

**REFERENCE BOOKS/LABORATORY MANUALS:**

1. Operating System Concepts, Silberschatz A, Galvin P B, Gagne G, 10<sup>th</sup> Edition, Wiley,2018.
2. Modern Operating Systems, Tanenbaum A S, 4<sup>th</sup> Edition, Pearson, 2016
3. Operating Systems -Internals and Design Principles, Stallings W, 9<sup>th</sup> edition, Pearson,2018
4. Operating Systems: A Concept Based Approach, D.M Dhamdhare, 3<sup>rd</sup> Edition,McGraw- Hill, 2013

**DATABASE MANAGEMENT SYSTEMS LAB**  
**(Common to CSE, CSE(DS ), AI&ML, CSE(AI&ML))**  
**(Professional Core)**

Course Code	Category	Hours/Week			Credits	Maximum Marks		
		L	T	P		C	Continuous Internal Assessment	Sem.-End Exam
2339452	Professional Core	0	0	3	1.5	30	70	100

**Pre-Requisites:**

Data Structures, File Organization.

**Course Objectives:**

**CEO1.** Populate and query a database using SQL DDL/DML Commands

**CEO2.** Declare and enforce integrity constraints on a database

**CEO3.** Writing Queries using advanced concepts of SQL

**CEO4.** Programming PL/SQL including procedures, functions, cursors and triggers.

**Course Outcomes: On successful completion of this course, the students will be able to**

**CO1.** Utilizing Data Definition Language (DDL), Data Manipulation Language (DML), and Data Control Language (DCL) commands effectively within a database environment

**CO2.** Constructing and execute queries to manipulate and retrieve data from databases

**CO3.** Develop application programs using PL/SQL.

**CO4.** Analyze requirements and design custom Procedures, Functions, Cursors, and Triggers, leveraging their capabilities to automate tasks and optimize database functionality

**List of Exercises/List of Experiments:**

1. Creation, altering and dropping of tables and inserting rows into a table (use constraints while creating tables) examples using SELECT command.
2. Queries (along with sub Queries) using ANY, ALL, IN, EXISTS, NOTEXISTS, UNION, INTERSET, Constraints. Example:- Select the roll number and name of the student who secured fourth rank in the class.
3. Queries using Aggregate functions (COUNT, SUM, AVG, MAX and MIN), GROUP BY, HAVING and Creation and dropping of Views.
4. Queries using Conversion functions (to\_char, to\_number and to\_date), string functions (Concatenation, lpad, rpad, ltrim, rtrim, lower, upper, initcap, length, substr and instr), date functions (Sysdate, next\_day, add\_months, last\_day, months\_between, least, greatest, trunc, round, to\_char, to\_date)
5.
  - i. Create a simple PL/SQL program which includes declaration section, executable section and exception –Handling section (Ex. Student marks can be selected from the table and printed for those who secured first class and an exception can be raised if no records were found)

- ii. Insert data into student table and use COMMIT, ROLLBACK and SAVEPOINT in PL/SQL block.
6. Develop a program that includes the features NESTED IF, CASE and CASE expression. The program can be extended using the NULLIF and COALESCE functions.
7. Program development using WHILE LOOPS, numeric FOR LOOPS, nested loops using ERROR Handling, BUILT –IN Exceptions, USE defined Exceptions, RAISE-APPLICATION ERROR.
8. Programs development using creation of procedures, passing parameters IN and OUT of PROCEDURES.
9. Program development using creation of stored functions, invoke functions in SQL Statements and write complex functions.
10. Develop programs using features parameters in a CURSOR, FOR UPDATE CURSOR, WHERE CURRENT of clause and CURSOR variables.
11. Develop Programs using BEFORE and AFTER Triggers, Row and Statement Triggers and INSTEAD OF Triggers
12. Create a table and perform the search operation on table using indexing and non-indexing techniques.
13. Write a Java program that connects to a database using JDBC
14. Write a Java program to connect to a database using JDBC and insert values into it
15. Write a Java program to connect to a database using JDBC and delete values from it.

**REFERENCE BOOKS/LABORATORY MANUALS:**

1. Oracle: The Complete Reference by Oracle Press
2. Nilesh Shah, "Database Systems Using Oracle", PHI, 2007
3. Rick F Vander Lans, "Introduction to SQL", Fourth Edition, Pearson Education, 2007

**FULL STACK DEVELOPMENT – 1**  
**(Common To CSE, CSE(DS ), AI&ML, CSE(AI&ML))**  
**(Skill Enhancement Course)**

Course Code	Category	Hours/Week			Credits	Maximum Marks		
		L	T	P		C	Continuous Internal Assessment	Sem.-End Exam
2305452	Skill Enhancement Course	0	1	2	2	30	70	100
<b>Pre-Requisites:</b> C Programming & Java Basics								
<b>Course Objectives:</b> <b>CEO4.</b> Make use of HTML elements and their attributes for designing static web pages. <b>CEO1.</b> Build a web page by applying appropriate CSS styles to HTML elements <b>CEO2.</b> Experiment with JavaScript to develop dynamic web pages and validate forms. <b>CEO3.</b> Developing JavaScript programs using Looping statements.								
<b>Course Outcomes: On successful completion of this course, the students will be able to</b> <b>CO1.</b> Design Websites. (L6) <b>CO2.</b> Apply Styling to web pages. (L4) <b>CO3.</b> Design Forms for applications. (L6) <b>CO4.</b> Choose Control Structure based on the logic to be implemented. (L3) <b>CO5.</b> Understand HTML tags, Attributes and CSS properties (L2)								

**List of Exercises/List of Experiments:**

**1. Lists, Links and Images**

a. Write a HTML program, to explain the working of lists.

Note: It should have an ordered list, unordered list, nested lists and ordered list in an unordered list and definition lists.

b. Write a HTML program, to explain the working of hyperlinks using <a> tag and href, target Attributes.

c. Create a HTML document that has your image and your friend’s image with a specific height and width. Also, when clicked on the images it should navigate to their respective profiles.

d. Write a HTML program, in such a way that, rather than placing large images on a page, the preferred technique is to use thumbnails by setting the height and width parameters to something like to 100\*100 pixels. Each thumbnail image is also a link to a full sized

version of the image. Create an image gallery using this technique.

## 2. HTML Tables, Forms and Frames

- Write a HTML program, to explain the working of tables. (use tags: <table>, <tr>, <th>, <td> and attributes: border, rowspan, colspan)
- Write a HTML program, to explain the working of tables by preparing a timetable. (Note: Use <caption> tag to set the caption to the table & also use cell spacing, cell padding, border, rowspan, colspan etc.).
- Write a HTML program, to explain the working of forms by designing Registration form. (Note: Include text field, password field, number field, date of birth field, checkboxes, radio buttons, list boxes using <select>&<option> tags, <text area> and two buttons ie: submit and reset. Use tables to provide a better view).
- Write a HTML program, to explain the working of frames, such that page is to be divided into 3 parts on either direction. (Note: first frame image, second frame paragraph, third frame hyperlink. And also make sure of using “no frame” attribute such that frames to be fixed)

## 3. HTML 5 and Cascading Style Sheets, Types of CSS

- a. Write a HTML program, that makes use of <article>, <aside>, <figure>, <figcaption>, <footer>, <header>, <main>, <nav>, <section>, <div>, <span> tags.
- b. Write a HTML program, to embed audio and video into HTML web page.
- c. Write a program to apply different types (or levels of styles or style specification formats) - inline, internal, external styles to HTML elements. (identify selector, property and value)

## 4. Selector forms

- a. Write a program to apply different types of selector forms
  - Simple selector (element, id, class, group, universal)
  - Combinator selector (descendant, child, adjacent sibling, general sibling)
  - Pseudo-class selector
  - Pseudo-element selector
  - Attribute selector

## 5. CSS with Color, Background, Font, Text and CSS Box Model

- a. Write a program to demonstrate the various ways you can reference a color in CSS.
- b. Write a CSS rule that places a background image halfway down the page, tilting it horizontally.

The image should remain in place when the user scrolls up or down.

c. Write a program using the following terms related to CSS font and text:

i. font-size ii. font-weight iii. font-style iv. text-decoration v. text-transformation vi. text-alignment

d. Write a program, to explain the importance of CSS Box model using

i. Content ii. Border iii. Margin iv. Padding

## **6. Applying JavaScript - internal and external, I/O, Type Conversion**

a. Write a program to embed internal and external JavaScript in a web page.

b. Write a program to explain the different ways for displaying output.

c. Write a program to explain the different ways for taking input.

d. Create a webpage which uses prompt dialogue box to ask a voter for his name and age.

Display the information in table format along with either the voter can vote or no

## **7. JavaScript Pre-defined and User-defined Objects**

a. Write a program using document object properties and methods.

b. Write a program using window object properties and methods.

c. Write a program using array object properties and methods.

d. Write a program using math object properties and methods

e. Write a program using string object properties and methods.

f. Write a program using date object properties and methods.

g. Write a program to explain user-defined object by using properties, methods, accessors, constructors and display.

## **8. JavaScript Conditional Statements and Loops**

a. Write a program which asks the user to enter three integers, obtains the numbers from the user and outputs HTML text that displays the larger number followed by the words “LARGER NUMBER” in an information message dialog. If the numbers are equal, output HTML text as “EQUAL NUMBERS”.

b. Write a program to display week days using switch case.

c. Write a program to print 1 to 10 numbers using for, while and do-while loops.

d. Write a program to print data in object using for-in, for-each and for-of loops

## 9. JavaScript Functions and Events

a. Design a appropriate function should be called to display

- Factorial of that number
- Fibonacci series up to that number
- Prime numbers up to that number
- Is it palindrome or not

b. Design a HTML having a text box and four buttons named Factorial, Fibonacci, Prime, and Palindrome. When a button is pressed an appropriate function should be called to display

- Factorial of that number
- Fibonacci series up to that number
- Prime numbers up to that number
- Is it palindrome or not

c. Write a program to validate the following fields in a registration page

- Name (start with alphabet and followed by alphanumeric and the length should not be less than 6 characters)
- Mobile (only numbers and length 10 digits)
- E-mail (should contain format like [xxxxxxx@xxxxxx.xxx](mailto:xxxxxxx@xxxxxx.xxx))

### Textbooks:

1. Programming the World Wide Web, 7th Edition, Robert W Sebesta, Pearson, 2013.
2. Web Programming with HTML5, CSS and JavaScript, John Dean, Jones & Bartlett Learning, 2019 (Chapters 1-11).
3. Pro MERN Stack: Full Stack Web App Development with Mongo, Express, React, and Node, Vasan Subramanian, 2nd edition, APress, O'Reilly.

DESIGN THINKING AND INNOVATION								
Course Code	Category	Hours/Week			Credits	Maximum Marks		
2304453	Engineering Science (ESC)	L	T	P	C	Continuous Internal Assessment	Sem.-End Exam	Total
		1	0	2	2	30	70	100
<b>Pre-Requisites:</b> Management science								
<b>Course Objectives:</b> <b>CEO1:</b> To familiarize students with design thinking process as a tool for breakthrough innovation. <b>CEO2:</b> To equip students with design thinking skills and ignite <b>CEO3:</b> To create innovative ideas, develop solutions for real-time problems.								
<b>Course Outcomes: On successful completion of this course, the students will be able to</b> <b>CO1:</b> Define the concepts related to design thinking (L1, L2) <b>CO2:</b> Explain the fundamentals of Design Thinking and innovation (L1, L2) <b>CO3:</b> Apply the design thinking techniques for solving problems in various sectors. (L3) <b>CO4:</b> Analyze to work in a multidisciplinary environment(L4) <b>CO5:</b> Evaluate the value of creativity(L5)								

### Unit I :

**Introduction to Design Thinking:** Introduction to elements and principles of Design, basics of design-dot, line, shape, form as fundamental design components. Principles of design. Introduction to design thinking, history of Design Thinking, New materials in Industry.

### Unit II :

**Design Thinking Process:** Design thinking process (empathize, analyze, idea & prototype), implementing the process in driving inventions, design thinking in social innovations. Tools of design thinking - person, costumer, journey map, brainstorming, product development.

**Activity:** Every student presents their idea in three minutes, every student can present design process in the form of flow diagram or flow chart etc. Every student should explain about product development.

### Unit III :

**Innovation:** Artofinnovation, Difference between innovation and creativity, role of creativity and innovation in organizations- Creativity to Innovation- Teams for innovation- Measuring the impact and value of creativity.

**Activity:** Debate on innovation and creativity, Flow and planning from idea to innovation, Debate on value-based innovation.

#### **Unit IV :**

**Product Design:** Problem formation, introduction to product design, Product strategies, Product value, Product planning, product Specifications-Innovation towards product design-Case studies

**Activity:** Importance of modeling, how to set specifications, Explaining their own product design.

#### **Unit V :**

**Design thinking in Business Processes:** Design Thinking applied in Business & Strategic Innovation, Design Thinking principles that redefine business – Business challenges: Growth, Predictability, Change, Maintaining Relevance, Extreme competition, Standardization. Design thinking to meet corporate needs-Design thinking for Startups- Defining and testing Business Models and Business Cases- Developing & testing prototypes.

**Activity:** How to market our own product, about maintenance, Reliability and plan for startup.

#### **TEXTBOOKS:**

1. Tim Brown, “*Change by design*”, Harper Bollins (2009)
2. Idris Mootee, “*Design Thinking in Business Processes*”, 2013, John Wiley & Sons.

#### **REFERENCE BOOKS:**

1. David Lee, “*Design Thinking in the Classroom*”, Ulysses press
2. Shrutin N Shetty, “*Design the Future*”, Norton Press
3. William Lidwell, “*Universal Principles of Design*”- Kritinaholden, Jill Butter.
4. Chesbrough.H, “*The Era of Open Innovation*”– 2013
